US Truths And Remedies

The US government has failed to be truthful to We the People (WtP) of our Constitution and has evolved into a Private Covert Plutocracy (PCP) that is controlled by radical right wing policies of our now Covert Shadow Government (CSG), protected by our Intelligence Operatives of the CIA, plus the mighty US military. They exercise militaristic dominance with WtP plus allied nations around the world. This started with their murder of JFK, by Lyndon Johnson/CIA/ Secret Service with joint US military and industry support in 1963. Bogus wars followed to keep our military tuned up and transfer the People's money to the radical right wing private sector through our over spending. The Bush family: Prescott, son GHW Bush, and grandson G.W. Bush guided the evolution of excess national debt with private industry to strip the government of its power financially by it borrowing beyond its means to enrich private conspirators in the CSG, while ruining the credit of the US government and democracy in general. Bogus wars from Vietnam through Iraq/Afghanistan have terrified our young citizens who were drafted pawns in these wars, while the economy was made terribly lopsided in favor of the financial elite and at the cost of the deprived lives at the low end of the economy. The poverty at the low end helped drive poor people into joining the US military where opportunity looked better. This economic evolution is against God's commandment of loving neighbor as self, where ***the joy of living on this gorgeous God-made Earth is shared by all neighbors (God's kids).***

I'll prove the lies and offer remedies to help save us and the planet.

GHW Bush was operating on an island off the coast of Cuba in 1961, running commando attacks on Cuba under cover of darkness for the shadow government. A brother in "Skull and Bones" Fraternity at Yale gave him the island for use for his "Zapata Oil Company" as a cover for being there. But he was there to help unseat dictator Fidel Castro for the C.S. Government.

On April 27th, 1961 JFK gave a speech at the National Publishers Association luncheon at the Waldorf Astoria, saying in part: "we are opposed around the world by a monolithic and ruthless conspiracy that relies primarily on covert means for expanding its sphere of influence… "It is a system which has conscripted vast human and material resources into the building of a tightly knit, highly efficient machine that combines military, diplomatic, intelligence, economic, scientific and political operations." "Its preparations are concealed, not published.... No expenditure is questioned, no rumor is

printed, no secret is revealed". *This is the conspiracy that killed JFK.* It has been privately run with the support of industry/banking, our military hawks, our intelligence network (CIA/NSA/Secret Service/ FBI), with the Bush family managing key spots in its operation over the 80 + years since the beginning of WWII. It is evil and self serving, and doesn't support the lower ~99% of humanity, nor life on Earth. **It is the Shadow Covert Government and the Private Covert Plutocracy** that need to be dissolved with: a reboot of democracy, better God consciousness in our nation under God, and peace and prosperity for all life on Earth. Let's begin with the truth on the JFK Assassination.

Richard Nixon was launched into the radical right political arena by Prescott Bush by answering his ad for a malleable attorney interested in politics. Nixon did well with early anti-communist propaganda in congress and made California state US senator with this popularity for bashing communism. Then Prescott Bush got Nixon the vice presidential nomination for his golfing partner, Dwight Eisenhower in 1952 to support Ike as his V.P. candidate during Ike's run for president. Ike had national fame as supreme allied commander in WWII and was a shoe-in for president in 1952. GHW Bush helped Nixon and his black OPS managers: E. Howard Hunt and Frank Sturgis, with the Bay of Pigs invasion planning and troops training to start the assault on communism in the Western Hemisphere with Cuba / Fidel Castro in 1961. GHW also provided 3 landing ships he named, the "Barbara" (his wife), the "Houston" (HQ for Big Oil) and the "Zapata" (GHW's oil company). The poorly planned and badly backed assault was preapproved by Eisenhower and would take place whether or not congressional approval of War against Cuba was provided. It wasn't. So it became a fiasco and a failure, angering some survivors to join the assassination plot in 1963 against Kennedy that GHW Bush and his radical right covert conspiracy concocted, after blaming JFK for "Pigs" failure. This ludicrous plan was supported by big oil and big banking, the joint chiefs, the CIA (that Kennedy was going to fragment and reduce), the FBI with J. Edgar Hoover, and the Secret Service, which was sick and tired of accommodating JFK on his extramarital affairs outside the White House that forced overtime and defiled the First Lady, Jackie Kennedy. JFK thusly became a doomed man despite bold action to stop a nuclear war with Russia over the Cuban Missile Crisis in 1962, and his Commencement "peace" speech on 10 June of 1963 at the American University in Wash D.C. which

offered a sort of peace that enabled improvements in both the Soviet Union and western democracies while maintaining mutual tolerance. But it became a fiasco and a failure, angering some survivors to join the assassination plot in 1963 against Kennedy This JFK assassination plan was supported by big oil and big banking, the joint chiefs, the CIA (that Kennedy was going to fragment and reduce), the FBI with J. Edgar Hoover, and the Secret Service.

JFK had reduced nuclear tensions and committed to getting us out of Vietnam by January-December 1965 with National Security Action Memorandum 263 of October, 1963.

But after his assassination in 1964 SS agent Abraham Bolden wanted to Be a witness to the Warren Commission of his knowledge that Secret Service (SS) under JFK were racists, and obviously did not make improvements in JFK's protection in Dallas, even after knowledge of the attempted coup in Chicago in September, '63. Abraham Bolden was then framed by the government and jailed for many years to get him out of the way. In *JFK's case his SS set him up and the driver killed him with one shot through his head that spectators thought was being fired in defense of JFK. But no, t*hey put him on a slow course, by taking a right from Main onto Houston and then a slow wide turn onto Elm St., with a pause, way against policy, to proceed to his luncheon engagement at the Trade Mart in Dallas *at 10mph* with 2 stops via the underpass, crowded with spectators on the overpass above (again, way against protocols). They moved the press way back so they couldn't film the murder and put in the SS car, after the limo, which failed on purpose to evacuate the president during the barrage of shots through the Plaza that injured him. Then the driver stopped the car and turned around and popped up and shot him in the head over his fist like a magic trick and then quickly sped off like nothing happened.

The SS eliminated his protection. They put him on a slow course. and failed on purpose to evacuate the president during the barrage of shots through the Plaza ***even after the back and neck hits.*** They removed the rear guards and moved the motorcycle escorts off his flanks.

He was set up at all angles and killed with a stop and a quick trick shot by his driver in a flash.

The Police Chief, Sheriff, and Mayor had sped ahead of the limo and waited safely under the overpass while the attack began from the top of Elm street to the picket fence on the grassy knoll, to avoid being hit by live fire. *In short JFK's execution was supported by his SS, his CIA, Dallas Law enforcement, The City, and the state of Texas.* Howard Hughes was one source of funding through Nixon to E. Howard Hunt, a paymaster for the JFK assassination. Maybe Operation 40, an assassination squad developed by Nixon kicked in support. Big Oil (Murchison) paid Ed Clark $4 million in oil land afterwards as his payment for their success. Ed was LBJ's attorney & business partner, and Lyndon gained the most (the presidency) by this, and Jackie was freed from her playboy husband and allowed to continue her decent life in style.

Jackie knew of the planned kill in Dallas and she had no other opportunity like this one to be freed from her philandering husband, and get the respect of the people and freedom to remarry for a better life. I understand her position and her desire to retain the respect of the world and not live with a womanizing roué, like JFK. But she was assisting in his murder. See 10 witnesses sloughing off the neck hit next pg.

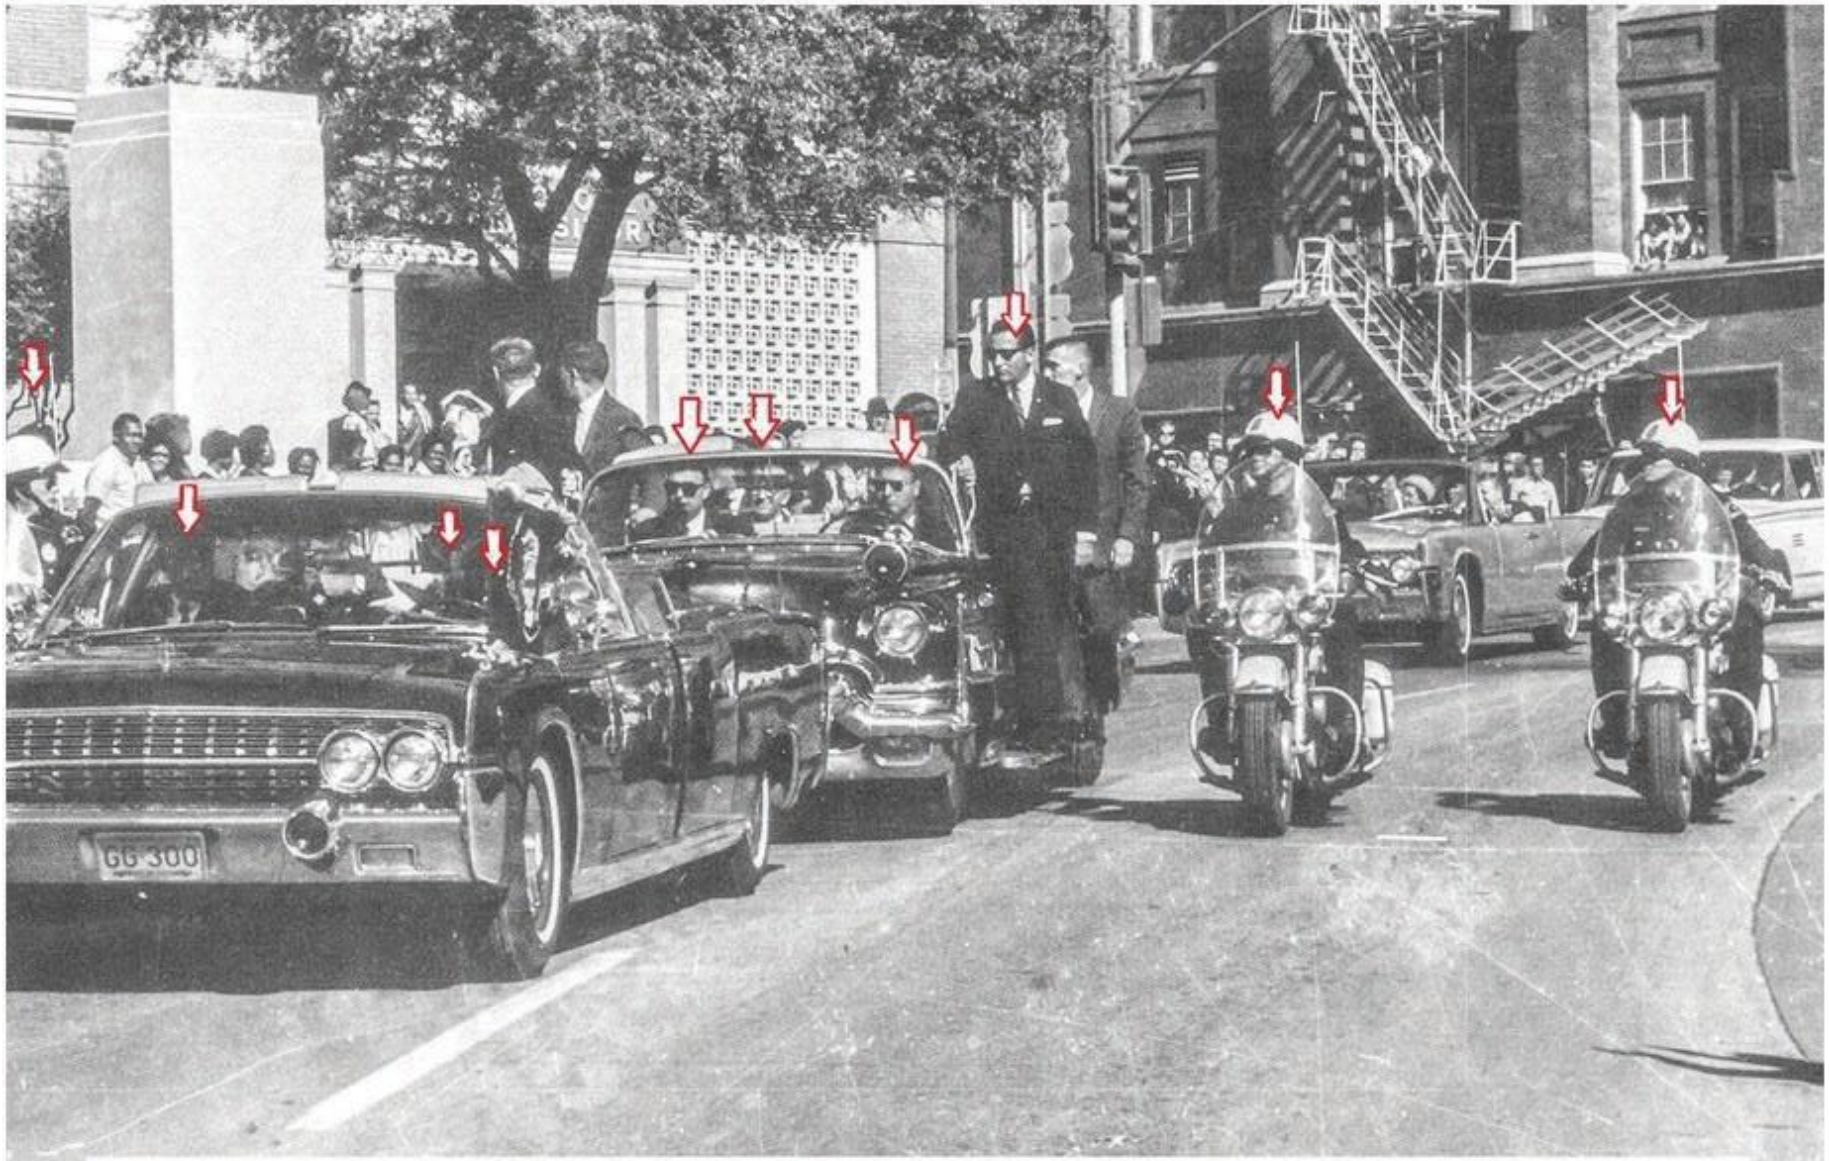
I blame the other conspirators, even though she was most definitely an accomplice to the crime. It was made to look like help for her husband. (But she should have pushed him to the floor at the top of the street and lay on him to protect him), while screaming for the limo to evacuate, to force the conspirators to go off plan. They might have killed her to get him in this case, but she had an opportunity to possibly save the president who was loved the world around. Instead *she ignored the first loud shot, his back and neck wounds, and propped him up, after he was injured, to keep him a target for the kill.* (It may have been her who was loved more around the world.)

I'm pretty sure that he knew he was under attack at the top of the street because he jerked his hand back at the first shot. The limo didn't evacuate.

Soon he heard a loud shot at Z170, and noticed that nobody reacted. He may have complained but shortly thereafter got hit in the back by a muffled subsonic rifle shot. So he stood up and said he was hit, as if to tell the crowd. "Is anybody supporting me?" he must have thought.

Kellerman, right front seat in the limo testified as to JFK saying he was hit, but he failed to move out in a hurry to the hospital, and in another 15-20 seconds, JFK was shot dead by his driver while Kellerman shielded his face from shot blast with a blue binder, per plan.

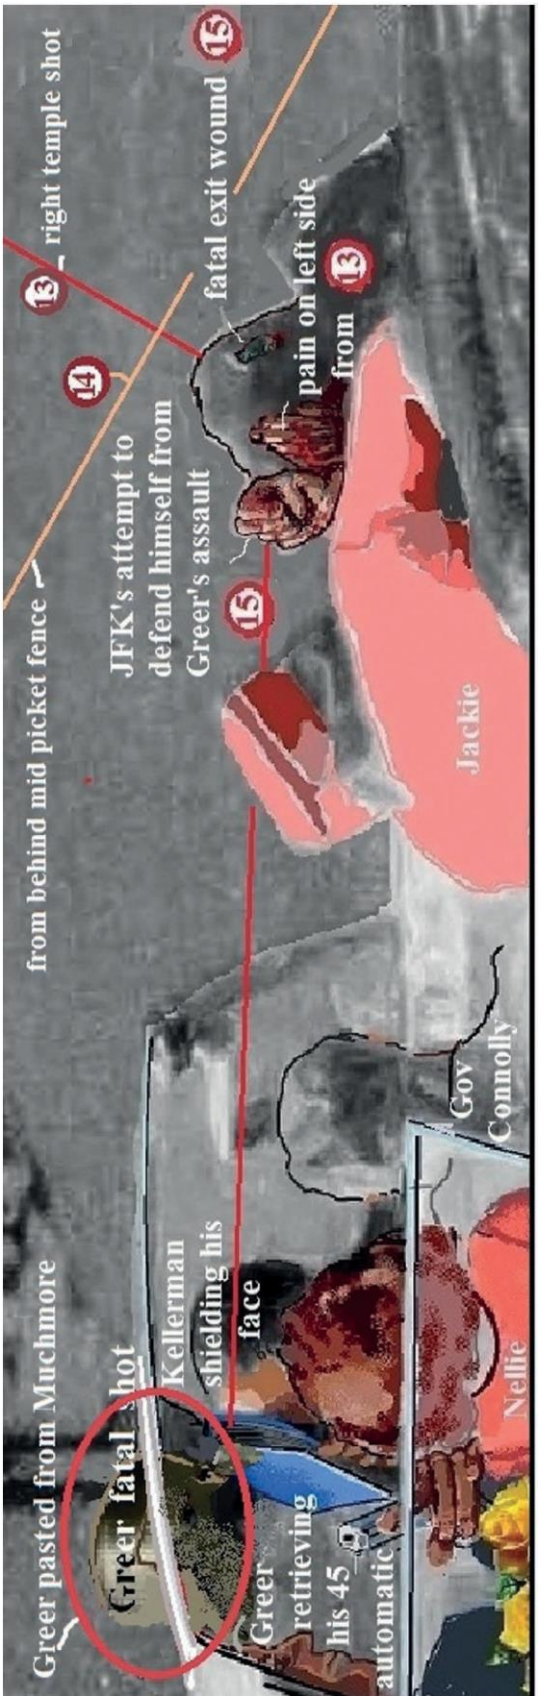
The back wound was a flesh wound and the bullet fell out easily during



6 Secret Service, 3 Police and Jackie witness JFK's 2nd Hit (neck shot) and do Nothing

the autopsy at the Bethesda, Md. Morgue. But the neck shot from the front (with no exit hit him at frame Z225 as shown in the Zapruder (Z film, which was fully edited (sanitized by the CIA, and not seen in public for 12 years.

TV anchorman Dan Rather saw the film within days of the shooting and said on the air that the fatal shot thrust JFK forward, <u>but that was a lie</u> that he may have been forced to tell, to suggest that the fatal shot came from behind by Oswald. I dislike him for not correcting his comment. He was a co-conspirator for that alone. I was 18 and ready to drop out of college and help pursue the culprits responsible as I was against my father's racism. I suspected LBJ and his fellow racist/supremacist pals. JFK's neck shot opened his trachea and made it hard to breathe and disabled his voice. He held both hands at his throat until the right temple shot from the knoll that stuck into his skull on the inside left, causing great pain. Then he grabbed the left side of his head with his left hand, *and then he saw Greer aiming his .45 at him, 4 feet away and raised his right fist but was shot dead in the right forehead near the hair line when Greer popped up and fired around his fist.* That shot blew out the back of his head 2.5inches wide by 4 inches tall, an oval hole that was instantly fatal, so he couldn't be revived at Parkland. The bullet was a narrow light weight sabot round made by the CIA that caused a concussion wave in JFK's head to blow out his brains out. He had raised his right fist, his only defense, for the fatal shot. This forced the driver to pop up to fire around his fist. A close up of a reprocessed Moorman Photo (next page left side) shows the fist, a fraction of a second after the fatal shot. It also shows the large exit wound from the shot. His body hadn't been slammed against the rear seat yet & Greer popped back down and is retrieving his .45 while keeping it low. Then he quickly passes his .45 to Roy Kellerman as will be decoded from a blurry picture later, who stashed it into the glove box. A strip of bright metal on the lower front edge of the glove box is caught by the bright sun to show it open. This one frame is evidence of CIA frame removals. It can't be seen in the moving film, only as a separate frame. I analyzed the Zapruder film and others one frame at a time. Greer's left hand then advances the .45 across Roy's lap. I decoded frame Z-318, and show it later to demonstrate the loyalty of some fearless patriot photo technicians. (Let's bust this conspiracy of the devil bonesmen) and recover trillions, as an "aside" while jailing the

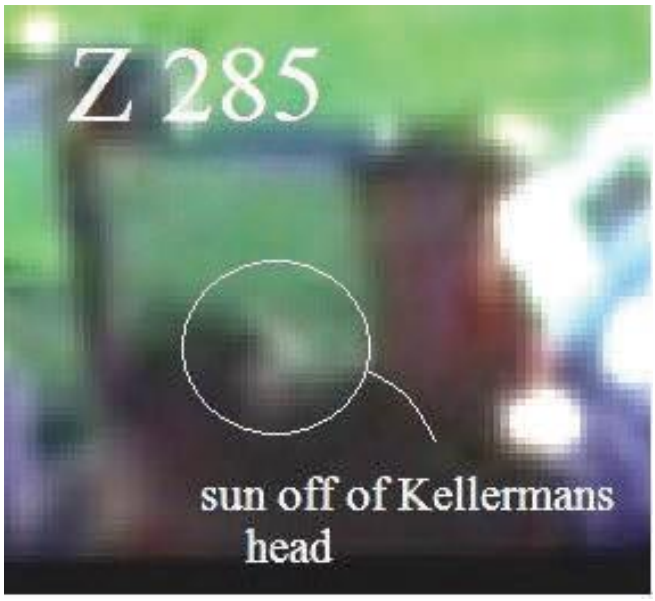


Instant After

Kill Shot

murderous thieves.) Below are Zapruder frames 303-316 with a shiny object coming into the scene opposed to the top of Roy Kellerman's head and then moving forward with its angle flattening out to point in

the direction of the president while becoming flat above the top of Kellerman's head as a flat topped shiny object. All human beings have rounded domes in the shape of their skulls.This includes Kellerman as shown in frame Z285, for instance, *when all occupants looked at JFK, saw a bloody president holding his throat and* ***didn't rush off to the hospital in a hurry!*** He would have survived the neck and back shots easily, but all in the limo and most in the SS car following knew of the assassination plan for the day, so Greer and Kellerman looked at each other at Z290 and Greer brought the limo *to a standstill again* for a few seconds to kill JFK. Officer Roscoe White hit JFK in the right temple from behind a stub wall 75 feet away.



Bill Newman witnessed the hit. Proof's on the next page. Witness testimony is at the top, left to right. Then the Mary Moorman scene reprocessed by me in Light Room with NIK Pro Sharpener 3, and color enhanced by me. *Marie Muchmore 's film* also had segments that showed Greer pointing his .45 at JFK and again with Pro Sharpener 3 it *disclosed the muzzle of the .45* indicating that the flat topped shiny object was a .45 automatic (Greer's personal fire arm, a shiny .45 automatic). Moorman captured the .45 being retrieved by Greer while Kellerman is shielding his face with the blue trip folder to avoid being burnt by the hot gases of the kill shot discharge. So we have two views identifying the weapon that killed JFK from ~4 feet away showing the muzzle of the flat topped shiny weapon pointed at JFK. Also the horizontal blur in Greer's head at Z313 is caused by the jolt of his .45 moving his head back to make it copy wider in that frame only while JFK's head explodes in the same (1/40 second exposure of) frame Z313. This is due to the kick of his .45 expanding the apparent width of his head, and the time coincidence nails Greer as JFK's assassin. Why else would a grievously injured Kennedy raise his fist in front of his face before the frame? He saw his killer, his driver, who shot him like a rat who was trapped in a corner. Many frames were removed to speed up the action. In their edit they removed evidence, then pasted the edited limo group on the alternate "moving" background, from a photo conspirator scanning the background behind the limo group at the kill site in Dealey Plaza to have a moving background available to print the new limo revised group, (with lots of "edit outs") onto this alternate "moving" background scene. This new background would show people looking where the president was ahead of them since the conspiratorial background scans could not include the limo group, as that would be pasted in with the "evidence removed" edited limo group later. This creates a very real looking fraudulent "moving" drive thru the plaza. Such is the extant Zapruder film available to the public.

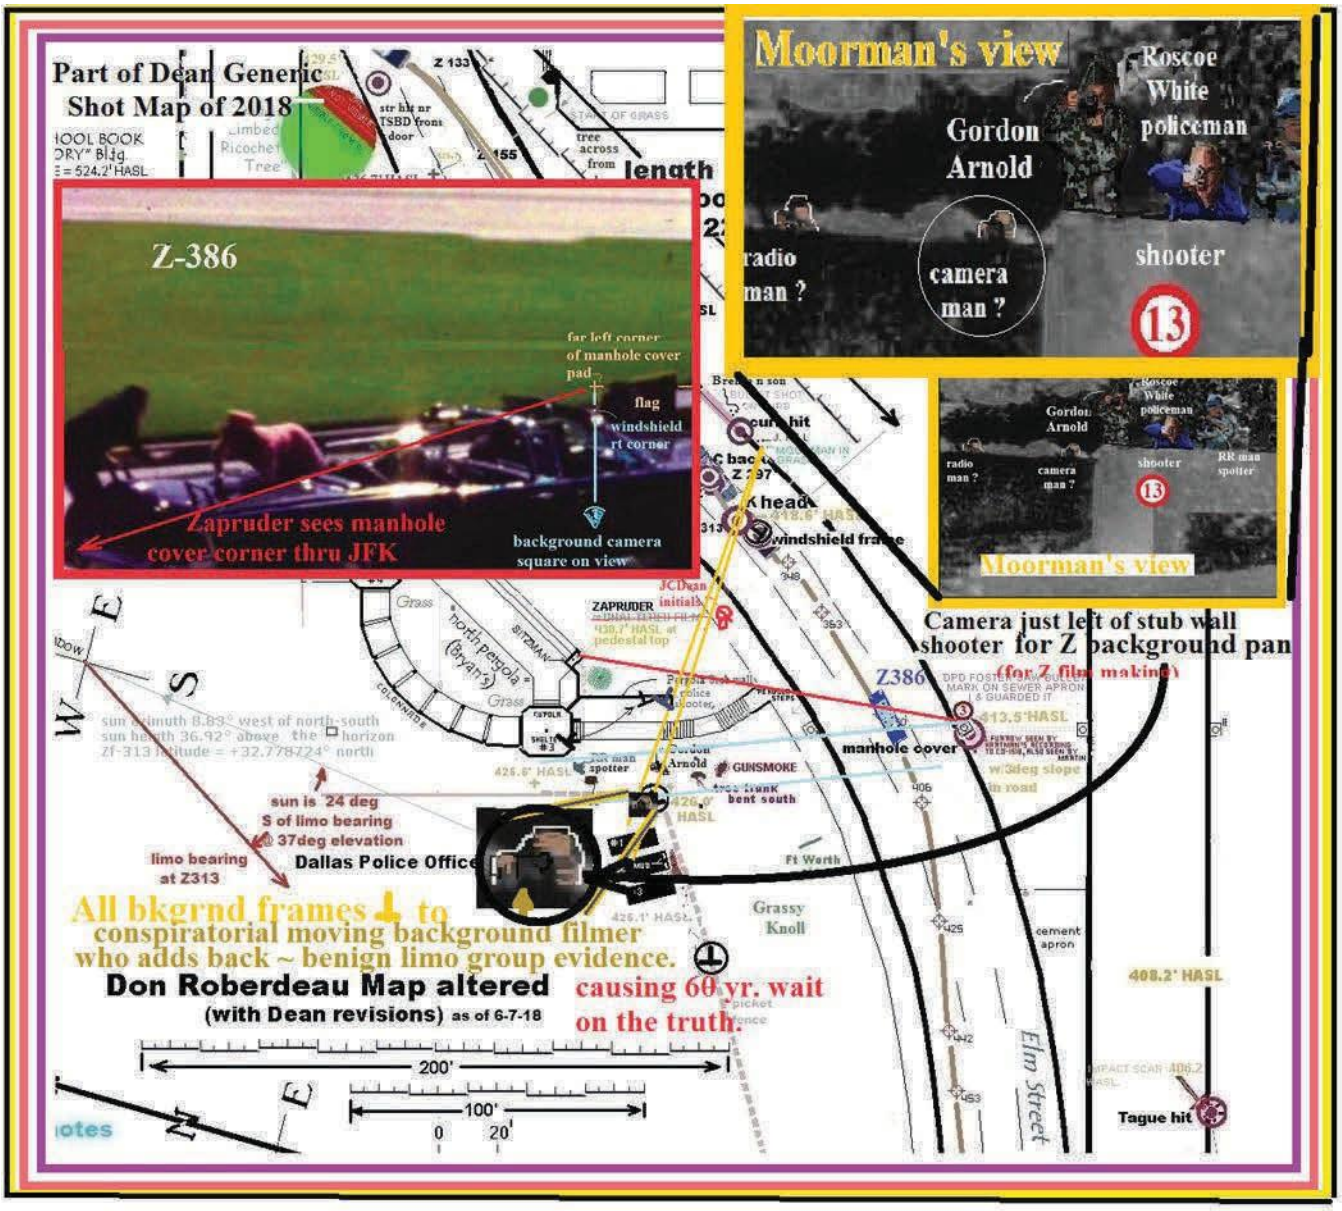
To Find the Background Photographer

I will demonstrate how to find the back-up camera man for these phony panned scenes. The pictorial below shows Z frame 386 inserted over the Dealey Plaza plot plan in the upper left hand position. A red



line connects Zapruder's position on the plot plan to the top of the man hole cover across the street. Mary Moorman's view of the knoll is shown in the golden box just to the right of the Z-386 above. It shows Roscoe White, the Police shooter on the right. Mary's in line with that shot that hit JFK in the right temple. Also in Mary's view is

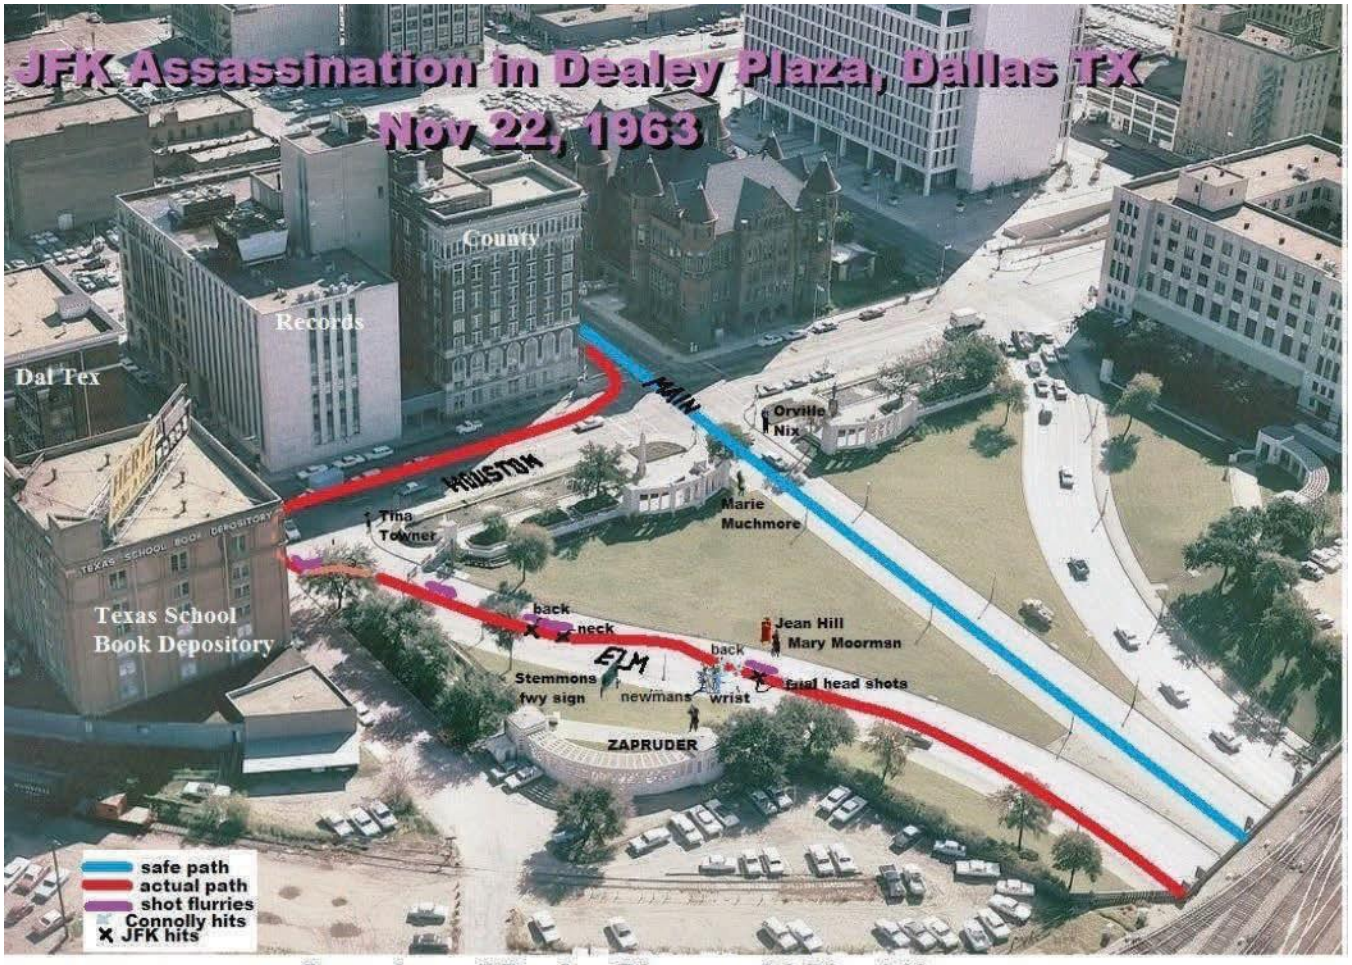
an army soldier, Gordon Arnold, who witnesses the shot while filming the scene. Another Camera man is shown to the right and beside Gordon Arnold, and he's circled in white behind the picket fence in the parking lot above the knoll. Arnold is about 15 feet behind White and the parking lot camera man about 10 ft to the right of Arnold and they're all oblivious to each other's positions as they focus on JFK. But the background conspiratorial camera man is this guy behind the picket fence. His view is the background shown in Z-386. The upper light blue line from the left side of the manhole cover pad, to its parallel line below it, would represent the locus of points perpendicular to the background scene shown in Z-386. The background camera man has to be within this range to produce Z frame 386's background appearance (as shown previous pg.). The red line connecting the pad on the manhole cover to Zapruder goes thru JFK's seat position in the limo <u>and</u> on the plot plan, and the little limo symbol is in scale and the tiny right rear black dot in that limo precisely represents JFK's position on the street by the altered Z film. This demonstrates that the remake of the Z film used a background scan taken by a man behind the picket fence. Zapruder's view of the limo seems consistent with that shown in Z-386 with mostly the right side of the limo captured through Zapruder's camera.

The real original "in camera film" would run longer with the slow speed and pauses and stops and shot evidence that happened during the live action of the kill. Proof of this is in frames where the background people and limo group people are both in perfect focus. In a moving parade the limo group should remain in focus while the people in the background are slightly blurred due to the relative velocity of the limo to the crowd when the camera is trained on the moving limo. When the limo pauses or stops both the limo group and most of the people in the crowd are in clear focus as eg Zapruder momentarily stops his scan. Most of the stop/pause film evidence shows a frame or two with this coincidental good focus evidence. But the majority of these frames were removed and trashed to eliminate evidence (e.g. stops) of all that happened and how long it took. While stopped, clusters of shots occurred; for instance pg. 14 and pg.15 show the wide turn at the top of the street when JFK was delayed and aligned for safe shots down Elm with no collateral damage, and while the limo was at a dead stop (~4seconds) for the fatal shot, page 7 (magnified 2-300%) , when the limo was between Mary Moorman and Zapruder or the Newmans and Mary Moorman. So Mary

Moorman, Jean Hill, and Mr. and Mrs Newman on the other side of the street were within 20 feet of the limo for the fatal head shots 13 and 15, right temple and right forehead. And don't forget back and neck hits, shots 7 and 9, pg 28. So the 3 shot scenario Oswald only, is totally bogus; there were 16-20 shots with 4 wounds minimum on JFK.

There's a pause/stop at the island separator & 3-4 shooters in the Dal Tex are the only shooters who might possibly cross JFK's path to the manhole cover for the 3 missed shots that hit there plus the sidewalk hit in front of Zapruder. All other suspect shooter sites would be way over JFK's head or have no coincidence of a JFK hit with the view of the manhole cover. I reproduced the view that these Dal Tex shooters had for shots at JFK above. *He was stopped* with clear street beyond at short range for the first shots. The overhead view, next page, shows witnesses, shot flurries, and his path down Elm below. It features the location of most key spectators and their movie cameras with respect to the wavy path taken to best accommodate the shooters for the kill. A loyal researcher Don Roberdeau prepared a detailed plot plan of Dealey Plaza with range scaling and elevation (Height Above Sea Level - HASL) and notes of great value to enable the creation of a forensic ballistic shooting analysis. He wasn't well advised for the limo path he shows. I was told how it

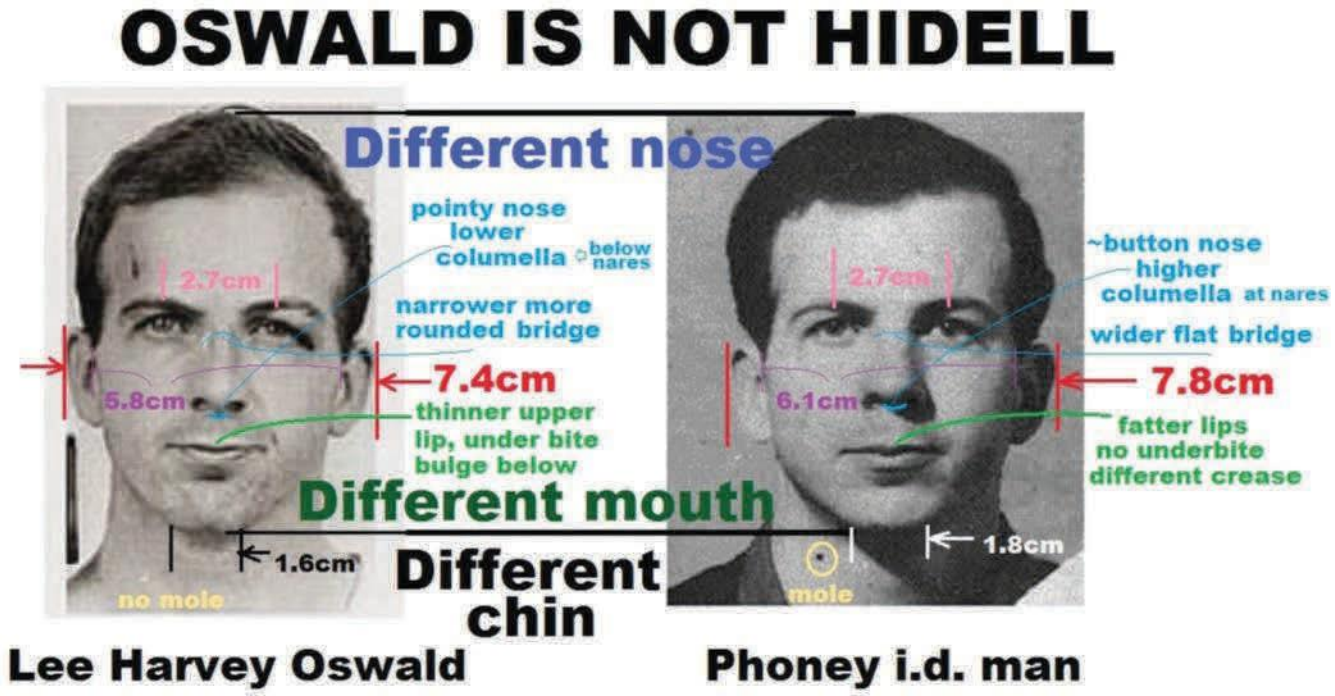
happened. But I still couldn't find any other researchers' use of Roberdeau's work with the correct path so I created my own regimen for this work that I believe is extremely accurate in tracking shots that day.
I published a summary of my shot data to account for all shots that hit or missed the president in my autobiography[1] . In preparation for that document I redid my shot analysis to be more complete than my previous works. I studied and incorporated the shots at the top of the street: the "firecrackers" that were really silenced rifles shooting subsonic rounds that could be disguised in the term "firecrackers" with silencers on those rifles. The plan was to kill JFK with a combination of multiple subsonic/silenced rounds with 3 loud, full strength, high velocity rounds spaced apart to mimic a single shooter having to reload for each shot. The single shooter patsy was Lee Harvey Oswald, who was incidental to the plan. He had a FBI manager and a CIA pay code and knew at least 1 (non-FBI) participant, Jack Ruby.



Overview of Dealey Plaza on 22 Nov '63

1. "Seeing The Big Picture" John C. Dean, 2019 free download on free-ebooks.net with registration and author search John C. Dean or on my website https://peaceandprosperitypath.com.

He was in Black OPS in the Marine Corp where he was a radar tech in the U-2 spy plane program, and part of a program that developed "doubles",or Look alikes, who had parallel lives but didn't know each other in the FBI, (*so the FBI could use one to create evidence on the other)***.** The "Hiddell" name used to buy a mail order Mannlicher Carcano was on an id card with a picture of a look-alike to Lee Harvey Oswald. It was planted with Lee Harvey Oswald's personal effects when he was arrested so he could be identified as the owner of the Mannlicher Carcano, that was chosen as the murder weapon the next morning.



This left all of Italy laughing as they knew that that rifle was insurance that the other side won the war. It would have never been chosen as the weapon to kill JFK. Besides existing ammo was 20+ years old and unreliable. And, *all of Japan astutely backed JFK's driver as the assassin from the Z film alone***.** Anybody with any sense could tell that something fishy was going on when the rear shooting Oswald suspect was put forth in the media as the killer on day 2. What started that confusion was the White House press secretary who 30 minutes after the shooting *told the nation and the world, for the first time, that JFK had been killed. He said the doctors told him it was a simple matter of a shot to the head, where he coincidentally pointed to his own right forehead on film released with this statement on day 1*. The government contended that the pointing didn't indicate where the bullet went in. But **it did**

identify precisely where the kill shot hit JFK at the hair line on the right forehead. Furthermore, Roy Kellerman testified that the last two loud shots were back to back in a split second, bang-bang and no rifle existed that could back this performance at that time. That being the case, the Warren commission , bound to telling the truth, lied, in *fact,* to the world to close the case, quickly. *At least two shooters were needed to reproduce what Roy Kellerman and the rest of the crowd heard.* So direct rebuttal to a lone assassin remains, from day one by an extremely close witness, Roy Kellerman, front right seat in the limo and JFK's personal body guard. Furthermore LBJ told Judge Warren that Cubans were on site and if that became known, he would be *forced* to attack the Soviet Union **(***not true***)**. Cubans who left Cuba were for Bautista and not communists. Irrespective, Warren got the message and found per J. Edgar Hoover's assertion that Lee Harvey Oswald was the lone assassin. Then the government cloaked the kill and all evidence into classified information to be held for 60+ years in the interest of "national security"? This may have baffled congress. *But no single person is a threat to national security with a single kill, especially when he's dead 2 days later. The whole case is bungled.* Our government covers-up or lies on the facts. *I present scientific proof of a 16-20 shot coup, which is the True Story of the JFK Assassination.*

FACTS

First, White House Press Secretary, Martin Kilduff announces JFK's death to the world. Parkland doctors in attendance at JFK's arrival at Parkland Hospital and assisting nurses added up to 22 people in the emergency room used. Doctors Carrico, Baxter, Perry, and McClelland started work to assist in oxygen provision to JFK. He had a ~4mm neat round entry bullet hole below his Adam's apple that intersected with his trachea to the lungs. Shot from the

front, there was no exit. They performed a tracheotomy centered on the bullet hole and inserted a chest tube to help breathing. A rear shooter would then constitute a conspiracy. Oswald was the only patsy of the government cover-up. Doctors Peters and Kemp arrived and assisted in chest compression for circulation. Blood was administered, but pumping only made bleeding worse, according to Dr. Jenkins. ***No brain activity was there. He was dead***. Before completing reports on their work doctors each annotated body diagram forms with notes on defects that day. Copies were available when I started research in 2008, and I had them. They have since disappeared from my computer. I know that there is intrusion into my files and things missing. I remember the 4 X 7 mm defect (bullet hole) to the right of T-3 in his back, the neat narrow round neck wound in the front with no exit. And a small high right forehead entry wound presumably connected to the 2.5 X 4 inch exit wound in the right temporal occipital region in the back of the head. I don't recall seeing the right temple entry hole but JFK reacted to the hit by grabbing the left side of his head with his left hand before the fatal shot. There was no rear neck wound, identified as the entry for the magic bullet by the Warren Commission/ Gerald Ford. That *was an outright* Ford lie *that enabled the claim for a single shooter. Nor was any proof given of Oswald's ability to track a moving target and get 8 wounds counting James Tague's from an errant bullet while firing 3 shots with a bolt action rifle in 6.5 seconds.* That seems impossible for any shooter. And, in fact, 3 NRA masters all failed to get a single head hit *on fixed targets***,** given 2 tries each with 3 rounds a piece per try in a Warren Commission sponsored test. Only 1 of 3 met the time constraint. The results proved otherwise, especially with what was found on the rifle: *a missing shim under one of the feet supporting the scope of the rifle* . FBI tested the rifle without the shim and got 2" X 8" AZ n EL errors at 25 yds. The weapon as found represented no threat. and Oswald shot "Maggie's Drawers" in his Marine Corp test by missing the board that the target was mounted on. He was not a master, expert, sharpshooter, nor a marksman. He was measured laughable with his rifle by the Marine Corp. The sights were fixed before the masters tested. What is worse, the Warren Commission threw out all missed shots (on the order of sixteen) so it began as

a ***<u>multi fraudulent investigation</u>***, ***<u>dodging the truth from the start !</u>***

And LBJ, (a murderous traitor**)** chose its members from the radical right wing who lied to try to stop a real investigation into the assassination of John F. Kennedy. The voluminous report measured 45 inches thick with 26 volumes, and *it is* a filibuster of an investigation into the murder of a US president. We The People deserve the truth. Unfortunately the covert worldwide conspiracy was in control of America and had the backing of our Nazi- like military, who frag to keep men and officers obedient to their illegal orders. This shocking truth causes all kinds of mental problems for veterans, and, I believe that my buddy from childhood and college roommate, Lt. Vincent Edward Duffy Jr., was also fragged for refusing to kill women and children in villages in Vietnam. The military documented ~900 fragged in Vietnam between 1969 and 1972. He was possibly one of them in 1970. But true to his faith, I believe, he lost his life to corruption in the military. I believe that Black OPS intelligence officers accompanying the troops cause these murders. I visited his plaque on the mall in Washington and wrote a note to the staff about Vince, approximately17 years ago. Years later I got a phone call from a man asking me if I wanted to know how Vince actually died. Not wanting to possibly turn into a vengeful killer, I responded, "no."
For this mission it's my life that may also be done. But I, too, am a man of God and a veteran, like Vince, and neither do I have protection from a covert foe. I do know the difference between good and evil. To me, God is Love and love seeks the truth, so I seek the truth, and not the crap we have been getting. I'm a man of logic & know how to explain the JFK murder with truth (facts and logic), and that's what this book is all about.

So let's get into the business of tracking shots taken at JFK. I used the scaled map of Dealey Plaza created by Don Roberdeau , a JFK assassination researcher. I found it on the internet in 2008. A condensed version of the top of that map shows the location where JFK was shot to death with Heights Above Sea Level (HASL) and a scaled drawing of all buildings and structures on the terrain below. Part of it is shown on page 21. Roberdeau deduced the path of the limo from the Z film, but it was in error with a modified Limo group and a conspiratorial moving background scan, not Zapruder's original. I benefited from fellow researchers who made sure I knew of the actual path (which was not straight). For most of my work, I made space on his map, keeping the HASLs, and used the 20' scale to create 3 other scales for my work. I show my generic shot map on the page past Roberdeau's condensed reference. I've added the location of Roy Truly,

TSBD Supt., who saw the limo pause/stop under his nose at the top of the street which set up JFK (see pg. 22). Please look up Roberdeau's annotated map of Dealey Plaza on the internet. It overwhelmed this book. All bullet hits he identified I carried over to my work as red encircled big red dots. All of those bullet hits are referenced in other publications that trace back to multiple people who witnessed the hits in Dealey Plaza that day. I list 2 of those shown on my generic shot map. And I use these facts for tracking shots. So I got perfect agreement with the final order of 16-20 shots, and my process is scientifically sound. To my knowledge, I present the only scientifically verified story of the JFK assassination to date.

After Roberdeau's partial map take a look at my shot map page 22. The first shots were fired from the Dal Tex Building just east of the Texas School Book Depository (TSBD). I contend that Supt. Roy Truly, and motorcycle Officer Baker found Oswald in the 2nd floor lunch room within ***40 seconds*** after the 2 loud shots at the end. He couldn't be on the 6th floor & in the lunch room, even a minute later. On page 23, I show the view of a shot on JFK from the Dal Tex that includes Tague in the background, That happened by accident when I tried to find where Tague would be and put him in on the separator between Main and Commerce. That makes him show up in the scope view on JFK's head in the limo when the limo is at the island separator after Greer's hard crank on the steering wheel to get onto Elm from his wide turn. I had no idea that my art would end up so real when I looked for a place to put Tague in the picture of the view of the Dal Tex shooters. **It shows JFK's need to be oriented this way on the road to make him a safe/slow target with clear street (except for Tague) beyond**, so one of the Dal Tex west facing shooters got the curb that sent a concrete chip over to cut Tague's face. No other shooters line up on JFK and Tague at the same time; same for the manhole cover shots. To view the Roberdeau and Dean Generic Shot maps, I recommend that you "Zoom" your view to 200 % or greater to be able to read all the detail that you may want. I included high bit count files for these maps that enable this magnification of view for comfort in analyzing my shot maps. Roberdeau has provided a time table of sorts for how it went down. My generic map also has high resolution pictorials for reading in comfort. I show Roy Truly right next to the limo at that corner turn, so his testimony is golden. The pause/stop at the road divider curb is when fire opened up. **The West facing Dal Tex shooter view was set-up with the wide turn to make an easy kill on that turn;**

but, I believe that someone, perhaps Oswald, messed with their sights. And all 3 shots missed near the man hole cover as well (went left).

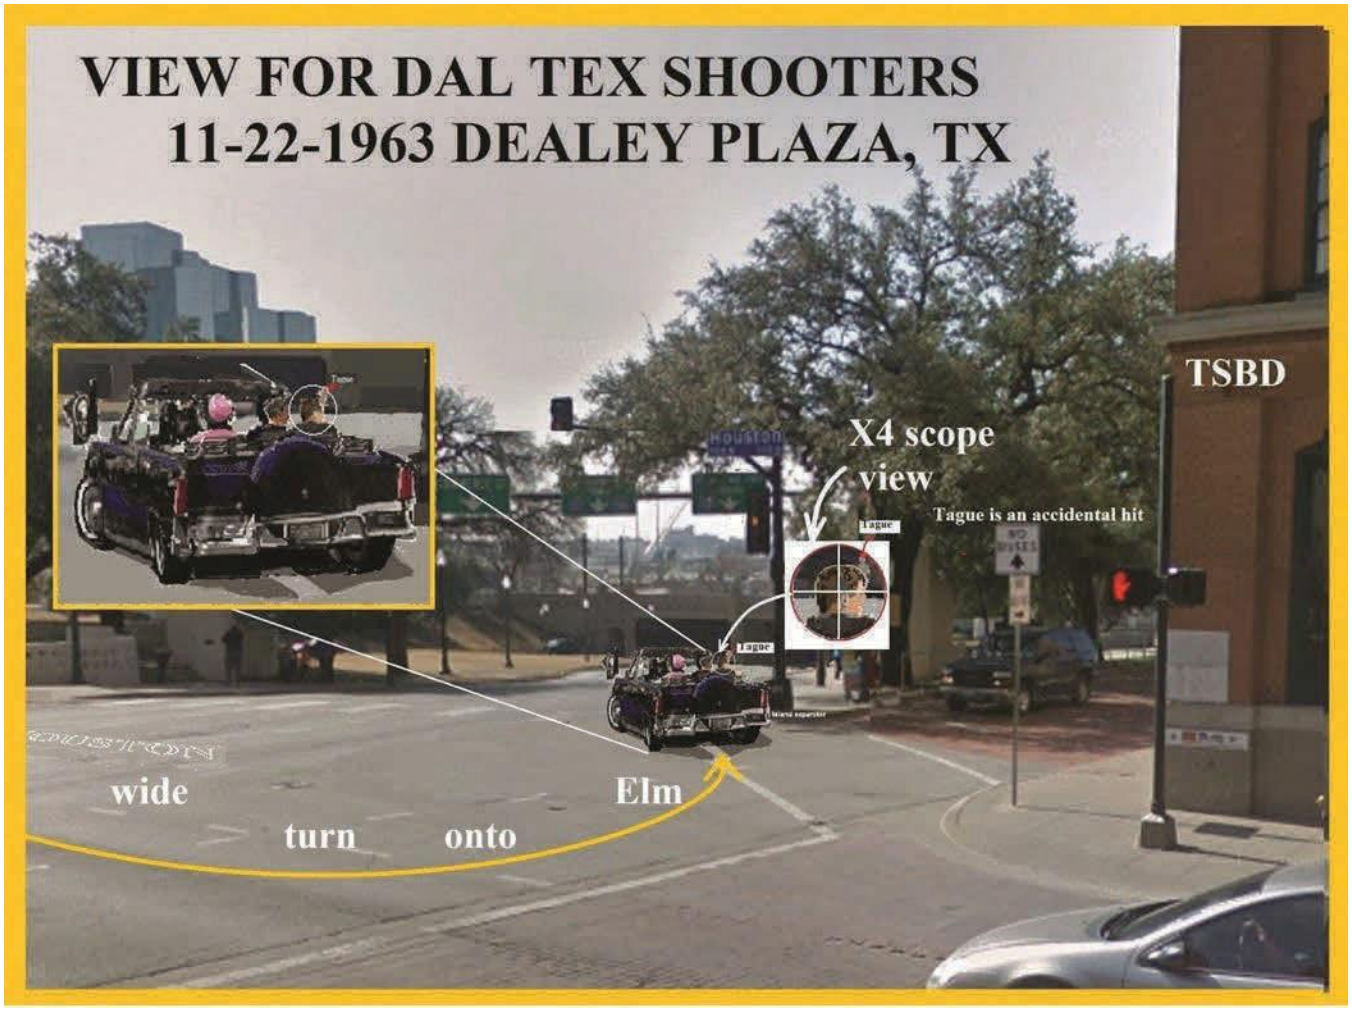
JFK Assassination

John C. Dean BSEE (UCSB)'67highhonors, MSEE Cal Tech '68 Capt USAF honorable '72 Engineer :Artist 'i,

Scientific proof of the JFK assassination scenatio requires the Identification of possible and known shooter positions, the witnessed nu positions of all shot,, knowledge of the path taken by the limo on Elm St, three dimensional modeling of each shot from scaled maps ofDealey Plaza with height information, knowl"edge of ballistics with real numbers and equations for bullet fiight time, fall due to gra,ity on a bullet in fiight, and air resistance and its effect on bullet velocity. Given this information and skills one also (leeds an understanding of1'ewtous laws of motion, and trigonometr ; and gfometry to hf able to calculate the shot trajectories and estimate which shooter tired and when and make sense out of the results fol' the overall sceoa1io. Those who do not follow and understand this full l'egimeo will fall short of scientific proof for their them-y of what happened that day.John Dean has evolved this regimen ovei· years to get the best scientific correlation he can with what happened.

July 1 ,2018JCD



I'll lay out the map segment that includes the first shot, so I can demonstrate the sequence of calculations needed to accurately track the bullet for a typical shot. One can get the best accuracy by enlarging the image with it's scale on the computer screen. Then I used a cm scale to measure horizontal distance to bullet hit point from the rifle on my computer screen to the nearest millimeter. *This gives us the suspected horizontal distance r_h from the suspected shooter to the bullet hit point.* Then we take the difference between the HASL of the rifle to the HASL of the hit point. *That gives us the fall f , how much the bullet fell in vertical height from the shooter to the hit point.* The declination angle for the shooter A_{dcl} is the inverse tangent or $\tan^{-1} f/ r_h$ or the inverse tangent of the fall over the horizontal range to hit point. This is trigonometry nomenclature to describe the fall on a bullet and the aim angle (if the bullet followed a straight line with no gravity effects, to the hit point). The straight line range, or slant range r_{sl} is r_h / *cosine* A_{dcl} **.** In reality, gravity will bring the bullet lower at the hit point as a function of the time it took for it to get there. The *fall of a*

bullet in feet due to gravity f_g is $16.1\ t^2$ where **t** is the flight time of the bullet to the hit point in seconds. The time **t** is the distance of the bullet's path divided by the average velocity of the bullet on that path *or* $t = r_{sl} / v_{avg}$. And the average velocity is the muzzle velocity of the shot minus the percentage loss on the path due to air resistance, which is a factor of distance of the shot. The chart below is what I used for nominal 1100fps subsonic rounds. *The first shot calculation is shown on a pictorial of the plot map titled first shot*, after the air resistance information at left.

AIR RESISTANCE GOES WITH V^2

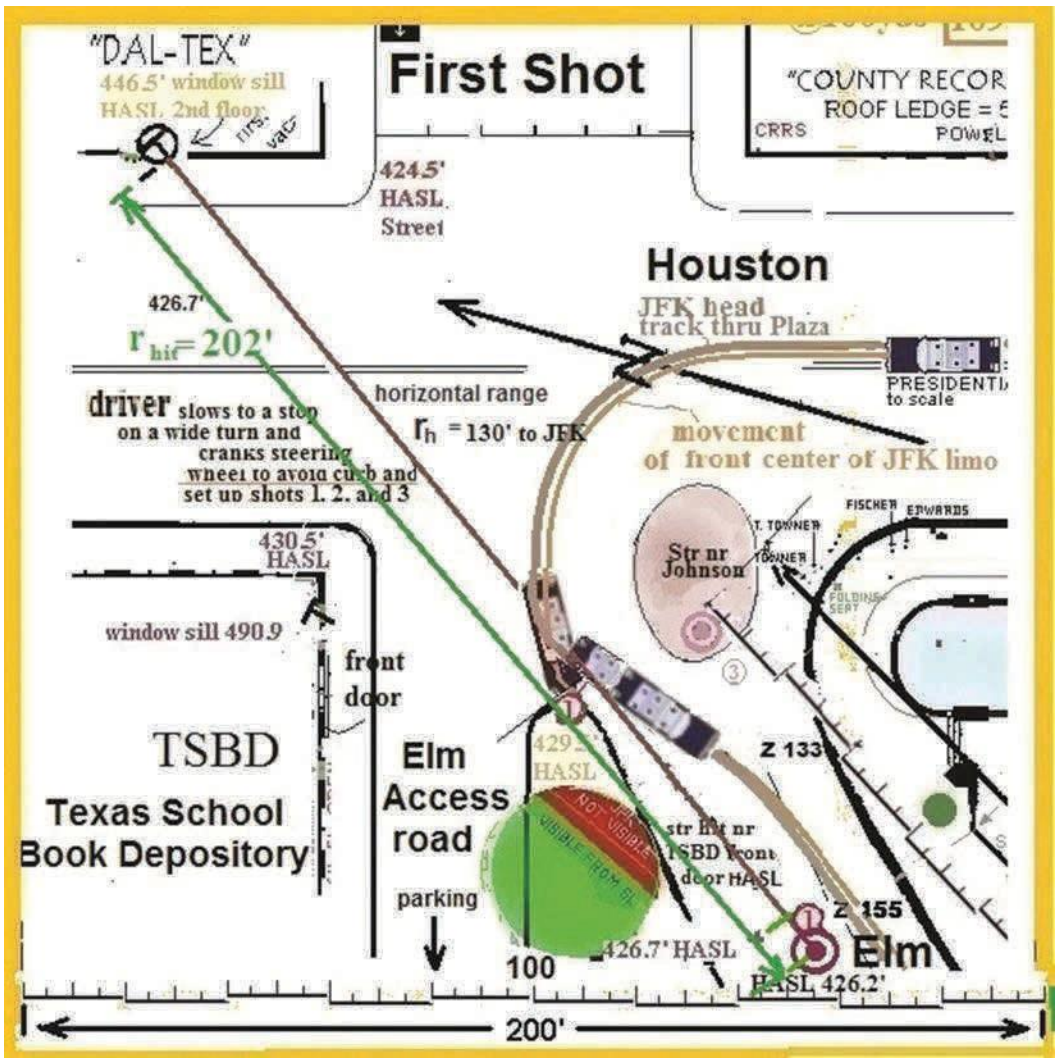
30-06 2860fps 180gr Nossler data shows 1.7% reduction in average velocity over 50yds. and a 3.4% reduction over 100yds.

An 1100fps round would then be a factor of $\left(\frac{2860}{1100}\right)^2 = 6.76$ less or

.25% for 50 yds .50% for 100yds, &

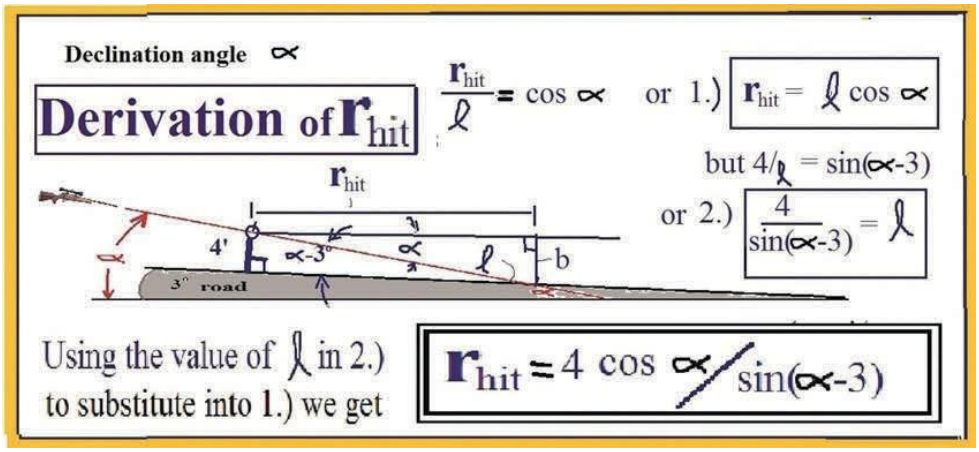
yielding avg v @50yds **1097fps**

and avg v for the same bullet & air conditions @100yds **1095fps**



The horizontal range to JFK is 130 feet. JFK's head is 4 feet above the street under him which looks to be at 429.0 ft, so his head is at 433ft with a drop of 446.5- 433 = 13.5 feet. The shooter's declination is $\tan^{-1}(13.5/130) = 5.9^{o}$ below the horizon. So where does it strike the road if he misses?

Let's derive the equation for the horizontal distance r hit down the road**.**

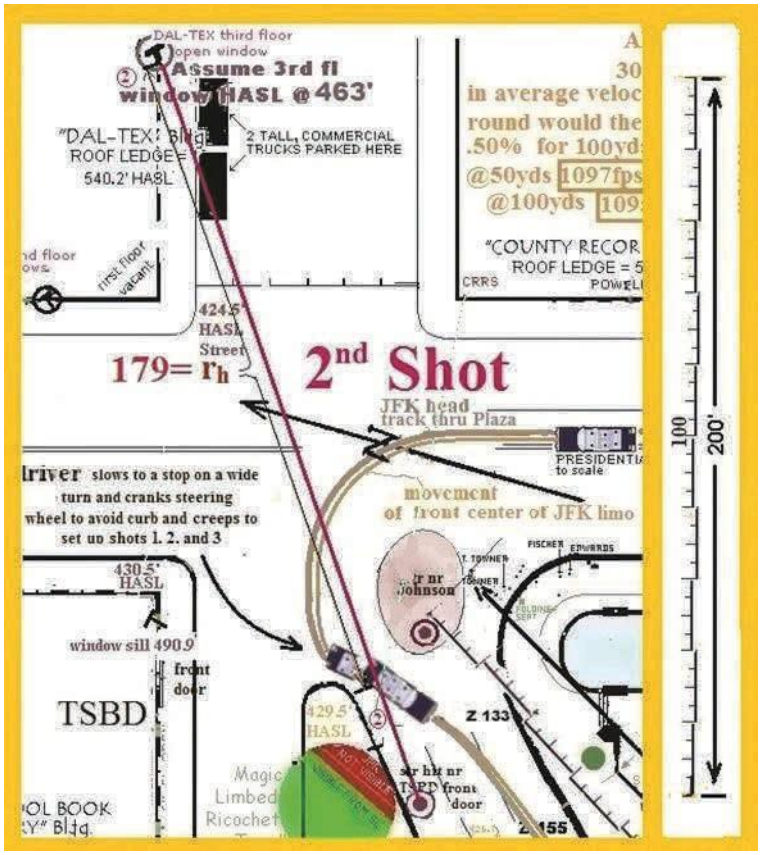


.

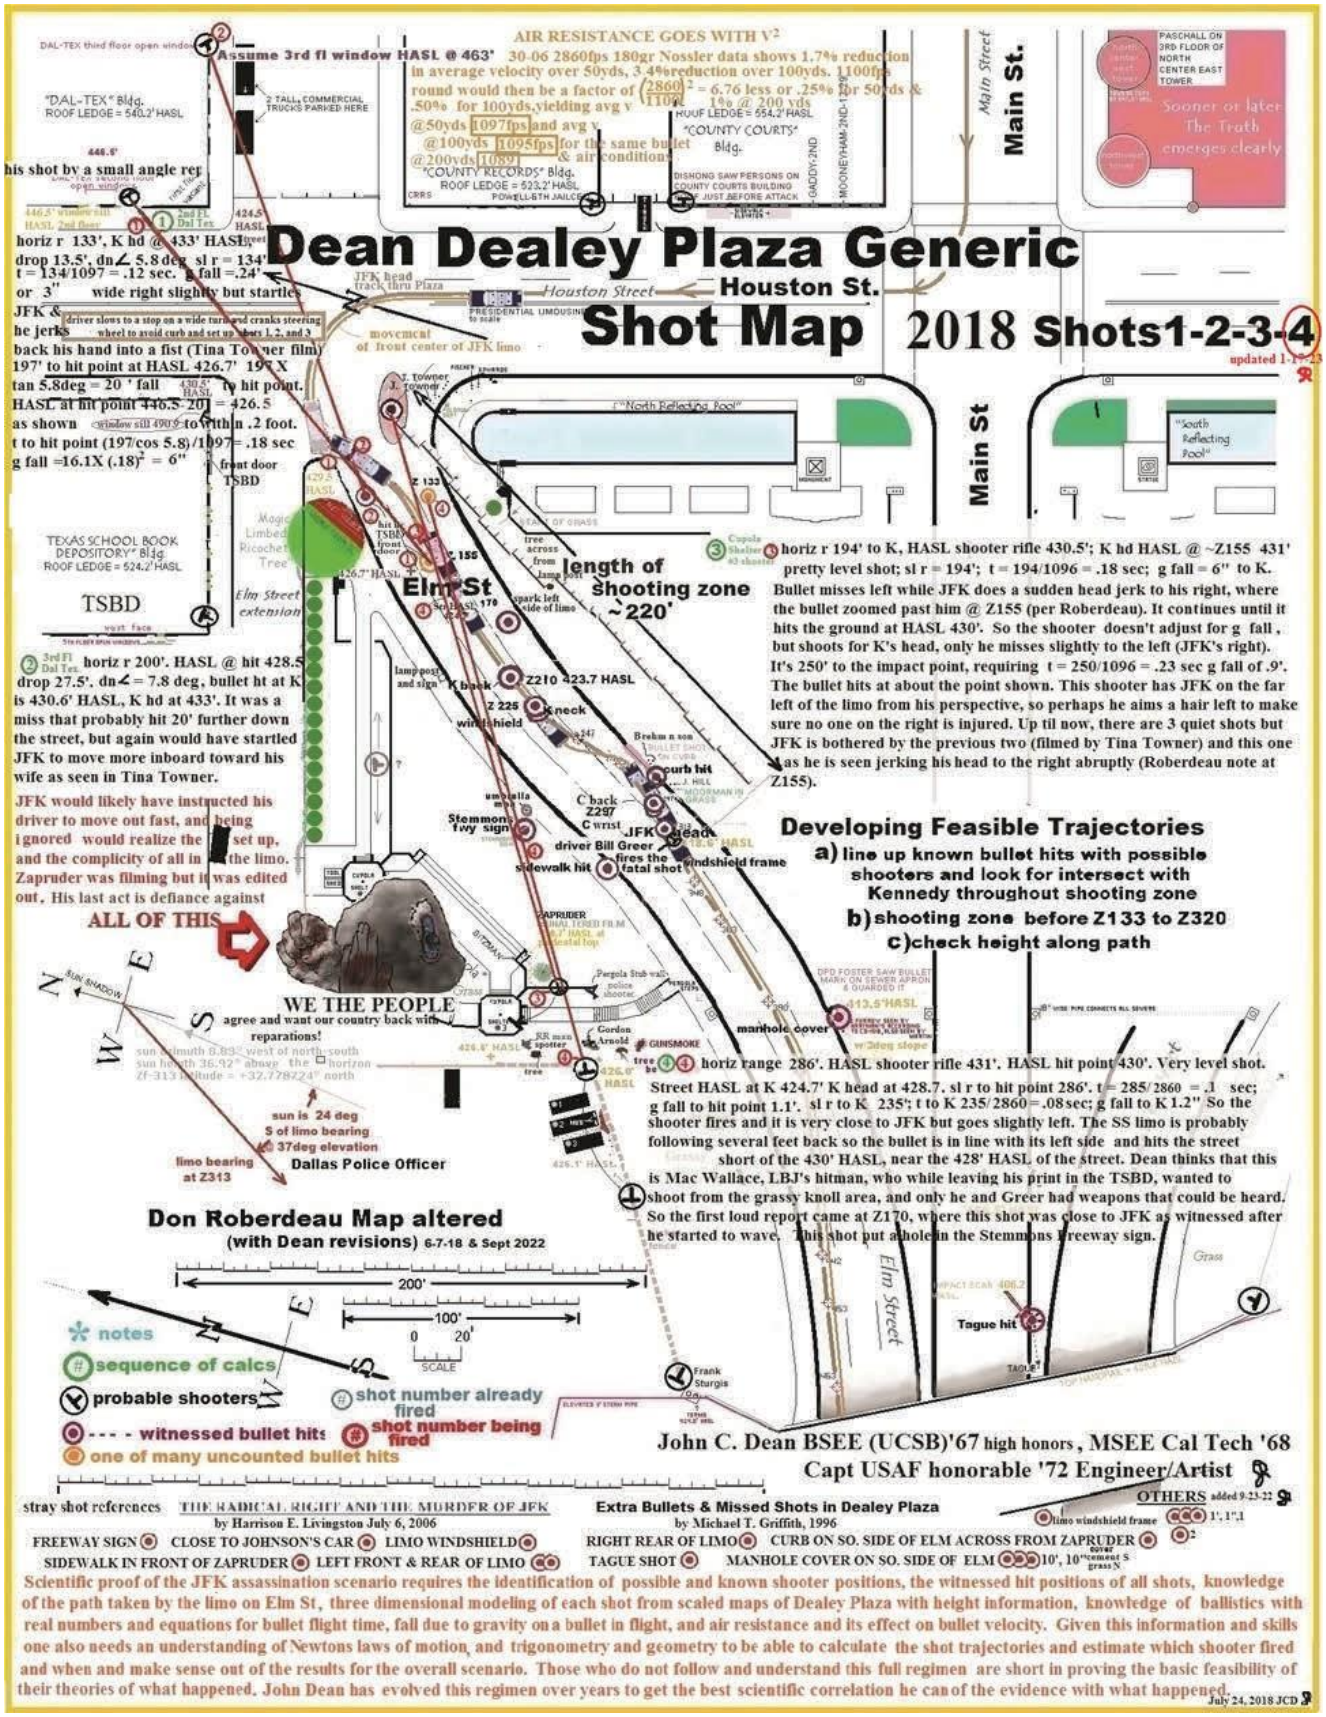
4 cos 5.9º/sin 2.9º = 79', so total horizontal range is 130 + 79 = 209';
But it measures 198' total horizontal distance. So the slant range is 198/ cos 5.9 = 199. And f_g is 16.1 $(199/1096)^2$ = .53ft. If a 3º road falls .53 ft feet every x feet horizontal range, what is x? x = 10.1ft So we subtract 10 ft. from the 209 calculation and get 199' for perfect agreement on shot 1. When considering the fall due to gravity.

For shot 2

4cos9.5/sin6.5 = *35 feet past JFK's head on the road, which is right on the center of the big red dot circled. Bull's eye*, or slightly off right of JFK. Again he hurries up his slide to his wife . This would be the hit near the door of the TSBD, as written on the map above the red dot. *The 2nd shot is right on* the hit point. The first 2 shots are verified possibilities! The *3rd shot* I give to the cupola shooter Who moves to the stub wall for this shot. He misses left and it hits towards LBJ's car, so his agent covers him. The map for the first 4 shots is on the next page.



The calculations are now shown on the multiple shot maps, 1-4 below



The *4th shot* is the first loud rifle round fired from behind the near corner of the Pickett fence by Mac Wallace, LBJ's hit man and assassination scenario designer. I believe that he fired this shot & #14 later to have control of the loud shots. The hit point HASL is ~428', interpolated from HASLs above and below. It went left of JFK's head at Z170 per Roberdeau. The calculations are shown on the shot maps. I have the ability to envision in three dimensions and with models draw what I envision accurately. That plus high school science and math enable the analysis accurately of bullet paths. All shots follow the same set of calculations. All math oriented teenagers could do this. The previous page showed the first 4 shots that show agreement for the physical layout, best shooter for that shot, and witnessed hit point for both people hits and background hits. A small red circled number refers to the shot number. When it's next to a shooter shown by a black **T** it indicates that that shooter fired that numbered shot. The same number next to the rear segment of the limo with a red line thru JFK's seat position (rear right tiny black dot) indicates that's where that shooter aimed his shot to kill JFK. The big red circled dots are based upon multiple reports from people at the parade who witnessed where bullets *hit the street (3+), sidewalk (1), manhole (3) cover, concrete pad of manhole cover, grass near manhole cover; limo (3+), Windshield frame(1), limo windshield(1), curbs (2+?), JFK (4+), post mortem 3-4?), Connolly(2), Tague (1), freeway sign (1), grass south of Elm (3+?), innocent bystanders (1?) = 18 shots for sure, plus a few more in the limo, on the grass, bystanders(?), & post mortem, plus what I may have overlooked. There is no doubt about this being a major conspiracy that framed Oswald.* On later diagrams I include some shooters **who were named by *Dr. James Fetzer, a major JFK researcher for many years.***

I was trained as an Air Force Radar Officer at Radar technical school in Biloxi Mississippi, in 1969. I was made class leader for a group of young officers with EE degrees who completed the 1 year course in 6 months and all graduated with honors. Then they assigned me to the Air Force Communications Service HQ at Scott AFB, Ill. in Satellite Systems Division of the Requirements Directorate under Col. (General elect) Iannicito. There I joined in monitoring the end of the TACSAT-1 test program and made plans for utilization of the satellites(TACSAT-1 and LES 6) in a joint service program, TACSATCOM IOC, using joint service developed terminal

equipment (plus procurements) to create the first Joint Service UHF and SHF SATCOM system for very high priority military requirements. I learned all terminal specs to be able to specify the power levels of any terminal talking to any other terminal with voice or teletype in a matrix of power settings that would maximize utilization of the power limited satellite assets across all users in the presence of non linear small signal suppression. For that the JCS picked the Air Force as the lead service responsible for creating a control center to monitor satellite operations to ensure planned performance enabled maximum utilization of the spacecraft (using the power tables). For that the Air Force sent me to the control site to help in its development and bringing it on line for operations. The new Commander was Major Ralph Maruca of the detachment. He made me the OPS officer. I got my staff educated on power control and helped overcome problems early on, so that it all ran well and OPS/Maintenance men were promoted as deserved for their fine performance. We ran 24/7. Two men were referred to OTS. My Master Sgt got his Senior Master Sgt stripe and my chief scheduler (a man of color) got his Master Sgt stripe, for their great work at minimizing conflicts among users. My Officer Ratings were excellent. In my autobiography, referenced on page 15, the JFK summary discusses the errors in the government remake of the Tina Towner movie at the top of the street. Of particular note is the fact that her remake uses a conspiratorial background scan that followed the limo so it shows the shooters shooting toward her where a big crowd was on the SW corner of Elm and Houston. That didn't happen. Shots 5 thru 9 on next page.

The Tina Towner remake by the government edited the limo group to appear the size appropriate for a normal turn onto Elm, by changing the size of the people in the limo group and the limo to make it as big as it should be if they were in the middle left lane going onto Elm. And the conspiratorial follow up pan around that corner was swept by the camera person to simulate the moving of the background with respect to the limo to make the limo appear to be turning left smoothly at a constant velocity. Then with mattes for the edited limo group they could expose their final background the conspiratorial moving scan of the background behind the actual limo long enough after the real pauses and stops to get a mostly disinterested crowd who already saw the president pass (with lots of faces crossed out for follow-on reactions to what they saw in the actual wide slow turn). It had to be clear to those people on the periphery of that turn, both inside the turn and around the outside that an attack was on the president while turning onto Elm. A segment was cut out

stray shot references THE RADICAL RIGHT AND THE MURDER OF JFK by Harrison E. Livingston July 6, 2006

Extra Bullets & Missed Shots in Dealey Plaza by Michael T. Griffith, 1996

FREEWAY SIGN · CLOSE TO JOHNSON'S CAR · LIMO WINDSHIELD · RIGHT REAR OF LIMO · CURB ON SO. SIDE OF ELM ACROSS FROM ZAPRUDER · SIDEWALK IN FRONT OF ZAPRUDER · LEFT FRONT & REAR OF LIMO · TAGUE SHOT · MANHOLE COVER ON SO. SIDE OF ELM · OTHERS

Scientific proof of the JFK assassination scenario requires the identification of possible and known shooter positions, the witnessed hit positions of all shots, knowledge of the path taken by the limo on Elm St, three dimensional modeling of each shot from scaled maps of Dealey Plaza with height information, knowledge of ballistics with real numbers and equations for bullet flight time, fall due to gravity on a bullet in flight, and air resistance and its effect on bullet velocity. Given this information and skills one also needs an understanding of Newtons laws of motion, and trigonometry and geometry to be able to calculate the shot trajectories and estimate which shooter fired and when and make sense out of the results for the overall scenario. Those who do not follow and understand this full regimen should keep their opinions as to what happened that day to themselves. John Dean has evolved this regimen over years to get the best scientific correlation he can with what happened.

July IU018 JCD

as well (that probably couldn't be sanitized). The president started to wave and suddenly jerked back his hand extremely fast (.22 second). I ran a test with my wife timing the 5 seconds, while I did as many cycles as I possibly could of quickly opening and closing my fist. I achieved 14 full cycles or 28 half cycles of either opening or closing my fist, so my average time was 5/28 = .178= .18 seconds, slightly faster than the president in his response to something obviously startling to him. A near miss of a bullet would induce such a response. My hand was a blur during my performance, which I reproduced for a radio broadcast from Brookings, OR, that the hosts commented about the blur of my fingers during my demonstration to them, to inform their listeners that I moved extremely fast. To me that indicated JFK's startling reaction to a shot very near his right hand during an attempted wave to fans on the corner of Elm and Houston, when they passed very slowly on the wide turn onto Elm at the road divider curb. That was the first shot. *Another key point is that one frame of JFK's right hand shown in the frames was half the size of all the other frames of that hand, in the wave. This suggests to me that the photo lab forgot to double the size of that hand in the transfer of the edited limo group to the new background scan to create the image of a tight turn of the limo onto Elm as the government edited film shows. They had to double the size of the images that show the limo group on the "real wide turn" in the original Towner movie to add them back against the conspiratorial moving background scan for their final print, showing a tight turn up close, which is what they almost spoofed perfectly***.** But I caught the error that shows their mistake. Other errors, e.g. felt pen cross outs of faces in the crowd, 4 frames missing, show their shoddy work. See my autobiography for that. Actually, 3/4ths of their frames had to be thrown out because of the slow movement around that corner gave them far too many limo group frames to be reduplicated for the 10mph turn of the new background scan to fit in. The jerk of the president's hand still shows in the fabricated segment but the background shows where the shooters were, inferring that they fired in Tina's direction to hit the president she had in the same frames on that corner. Her corner was packed with people and scores would have been wounded if the government remake of Towner was accurate in where they show the president's frightful hand withdrawal reaction to a bullet while Tina captures both the shooters locations and JFK on that turn. That implies that the shooters were shooting toward Tina Towner when JFK jerked his hand while Tina saw the Dal Tex building and JFK in the scene at

the same time that the hand jerk occurred. Tracing lines from a known shooter position (2nd floor west facing~35 feet north of the Dal Tex SW corner) thru JFK brings the shots toward where she was filming. That could not have happened without injuring people near her at that crowded SW corner of Elm and Houston. So my account of the remake of the Towner movie proves the conspiratorial remake with bigger limo & occupants and a moving scan by a conspiratorial background photographer panning the scene right to left near (but not including) Tina Towner and after the limo is out of the scene. Then a sanitized and enlarged limo group is added to that scene that is panned, using mattes of the new large sanitized limo group to block transfer of the group from the copying of the new background in a bipack while optics perfectly align the running of the new limo group positive image to fill in where the limo group needs to be exposed while blocking the background on the second pass. I forget whether this required two passes thru the bipack. First they lay in the panned delayed background minus the new limo group (in mattes). Then rewinding to the start frame they add the positive image of the new enlarged limo sync'd to the new background in time, plus the background mattes to expose only the limo group's part of the film in the combo scene. I know that they accomplished this in those days in Hollywood and I'm sure the CIA photolab had the equipment and know how to achieve this overlay, perhaps, one frame at a time using an optical printer for perfect alignment.
I mention in my notes that I believe that Mac Wallace may have had the supersonic rifle, as that gave him control of the timing of the 3 loud shots, which needed to be spaced apart long enough to simulate a single rifleman kill, where time to eject a shell casing and reload another round plus aim for the next shot needs to be implemented between shots. But Mac didn't have real time control for coordination of shots with Bill Greer for plan B, where the driver takes over the kill shot. So they accidentally fell on each other with the loud bang-bang for the last two shots, too close together for one bolt action shooter to achieve. *This ruined the plan to make it sound like a single shooter assassination.* So it had to be a conspiracy. (2 or more shooters). Not recognizing this error in the JFK assassination research community has given the government 59 years of grace for its complicity in JFK's murder. And the complicity of 5 future presidents for their knowledge and participation (minus G.W. Bush) in JFK's murder and cover-up: LBJ, Nixon, Ford, Bush1 & W (knowledge) are real bad guys. *The chiefs of staff of all the armed forces*

(minus, perhaps the commandante of the Marine Corp) consented to JFK's removal by force. The Army Chief of Staff, Gen. Lyman Lemnitzer introduced the military tactic of shooting one's self in the foot and blaming it on another country to force war upon them. George W. Bush brought that plan into fruition on 911 with his demolition of the twin towers, Bldg7, and the Pentagon missile attack which led him on a hunt for weapons of mass destruction in Iraq, and Osama Bin Laden in Afghanistan and the Afghanistan War for their harboring of this international terrorist. This 21 year long evil war in Iraq/Afghanistan is just part of the covert takeover of the world as discussed in the beginning of this book. And the way that the Nazi-like radical right took over is by *appointments into government of civilians in private industry* who in the right numbers and locations can channel borrowed money of the government into private hands (by joining in the conspiracy and over contracting with conjoined private industry) and bankrupt the federal government with a debt the same size as their cash contracts into private contractor's hands in the economy. They appoint and swear in all help to do this and use black Ops killers and torturers to enforce it against the lives of these employees' treasured friends and family. They've been writing checks to themselves for about 40 years since the *disgraceful Reagan tripled our historic debt. It started too big and kept doubling with new Administrations.*

The 3 generation Bush family: Prescott- GHW- "W" are the premier family, all bonesmen, who dreamt up all sorts of horror for this organization. They helped kill JFK. They demolished the towers, killing ~3000. If no debris gets in the way the buildings can come down in as little as 10 seconds, AND THEY DID!, -all covert activities. Pretty amazing and very horrific. Wars: Vietnam, Iraq 1, Iraq2/Afghanistan, 31 years worth waged by Bushes. They frag those in their way and are richer than Croesus. May all the seed of Prescott Bush perish from the Earth naturally. May Big Oil become Humongous Solar & Wind and be owned by We the people. May we shrink armies and use black ops for black hardware development and spy capture only! May we share in the celebration of life by implementing wealth and income controls and raise the rich sides' taxes to balance the budget plus raise the pay at the low end of the economy to enable their celebration of life, plus pay off the existing debt over 50 years? *Love neighbor AS SELF so we may all celebrate life! Clean up the oceans and fresh water sources, and diminish human population by natural attrition while increasing wild animal habitat? Stop landfills of poison (e.g. rotting plastics)? Crush supremacists and racist*

behaviors! Liberate sports from gambling interests! Do more Peace work. Above all, make all improvements SUSTAINABLE ! Make all organized faiths mutually compatible or tax self serving and evil doing religious activities (any activity against people's rights in the subject state or federal rights within the nation). Crush organized crime! Allow citizens (or store personnel) deadly force in defending against gang thefts (of 3 or more violent thieves)? -- Customer disputes don't qualify as violent gang thefts.-- Let women's concern for their own health govern abortions in the earlier phases of pregnancy! Keep the CIA out of domestic affairs: of controlling news sources or destroying private property; out of creating news, forcing news to shut down, any leverage/force against news operations or civil matters of the people at large, no bogus badges ever, no murders, no removal from or hiding of data in private computers, (as done with me); Use no phone taps, no computer taps, nor any surveillance. Same for the FBI unless they present their complaint and evidence supporting it to their suspects in advance of any action by 2 days to enable a preparation of a defense or counter argument by the suspect to clear that action in court. No FBI removal of any records from suspects computer, only copy them if the appropriate warrant is signed by a judge with the jurisdiction/authority over the FBI action and the suspect. Distrust of the *FBI / CIA / SS has to be rampant with their complicity in the JFK assassination / cover up these last 60 years***.** Post mortem surgery on JFK discussed in the presence of FBI agents at Bethesda denied, denial of Mac Wallace fingerprint in TSBD by FBI, Hoover's claim on Oswald before he was identified as "in custody & with no evidence in hand". False dead body print on Oswald from his mortuary, denounced by an FBI expert in latent finger print identification was still called "Oswald's palm print on the rifle" *in the Warren Report***.** CIA made badges for film collectors & gave *false info re: Oswald & Mexico/Cuban connection* before they helped kill JFK. and FBI Director J. Edgar Hoover/CIA David Atlee Philips were felons to get a fellow felon, LBJ, the VP spot under Kennedy and help kill JFK. LBJ was a murderer (through orders to his hit man, Mac Wallace) to kill his sister, kill the federal agent for cotton allotments, kill JFK, the assassination scenario, give up a finger print in the TSBD and most likely fire 2 of the 3 loud shots in Dealey Plaza in an attempt to kill JFK on 22 November, 1963. And what happened to the 3 poll workers at the voting site where 200 votes were added to LBJ's senate primary contest with a senior senator from his state who lost

by a close margin to LBJ in 1948...? LBJ's ticket to Wash DC should never have been endorsed by the FBI/CIA. Hoover enabled murders of JFK and Martin Luther King Jr. and participated in racism/ advancement of the RAD RIGHT. CIA/LAPD killed Robert Kennedy. See the visual proof next.

Hoover and LBJ need to be defamed and their names taken off any of the peoples' buildings, roads, highways, etc. and illicit wealth returned by inheriting family and friends; the *same with the Bush family threesome and their beneficiaries ad infinitum.* *Make businesses of private armies / militias / forces of any type illegal !* everywhere, except in the limited protection of money/valuables/and human transport protection in peacetime. *Allow no use of private forces to support our military anywhere, because this allows the covert members to use these forces for their evil purposes.* The dark acts passed by W, e.g. the "Patriot Act", gets foreign or U.S.troops to attack neighborhoods in America for insurrection *that may well be the liberation of "we the people" from world covert conspirators against them. Eliminate this "Traitor's Act" This should include elimination of the threat of Trump's armed political supporters against "We the People". Racist and supremacist forces may revolt against all order and kill innocents in the cause of re-instating Trump as president, something that*

he's predicted, if he is arrested for real crimes and misdemeanors that he perpetrated pre-, during, and post- 6 Jan, 2021, including his theft of classified information for use at his private property, as if he owned these classified documents. *These are essential for the protection of the US security, and now compromised* ***by him****, for not being protected in a vault as some of the documents required.* He is, therefore a major traitor against our country! Arrest him and press charges in court to continue his incarceration**.** Remove judges who protect crooks. And racism and supremacist philosophies need to be outlawed within our country and not allowed as part of free speech, because*: Free speech should not include arousal of illegal actions against We the People. Trump is an inciter of violence against our own government/people, and should be jailed for the rest of his natural life. The armed forces may be needed against his immoral and dangerous supporters. Trump's far right wing adventures are very reminiscent of Adolf Hitler in the thirties when he became chancellor and the parliament building, the old Reich Stag, burned, so he used martial law and the SS to become "Der Fuhrer" to quell riots and beat back the communists and other insurrectionists against him, while declaring Germany a National Socialist country; <u>only to kill millions of innocent Jews, to amass treasures for himself, and to allude his killing/capture.</u>* So after WWII, Truman instituted the Central Intelligence Agency (CIA) and Allen Dulles was appointed as its first Director**.** *Dulles imported ex-Nazi intelligence officers to help train our new agency in covert operations and all kinds of dirty tricks and schemes* to black mail people into continued evil service acts so as not to be prosecuted for their first evil acts. I suspect that a good president, Bill Clinton, was also blackmailed by GHW Bush after he may have approved some secret missions to assassinate evil foreigners during his terms as president. He ended up becoming apparent friends with GHW Bush; Bush being a total Nazi from a Nazi supporting family. His dad, Prescott, was censored for his work to raise money in American investments using Nazi funding, perhaps gold, and support the huge industry run by the Nazis to crush opponents, usurp opponents' economies and separate out the Jews to send to forced labor or death camps on captured soil. Prescott was censored many times repetitively for raising funds for the Nazis, who, by the way, had the support of international star, Charles Lindbergh as well. Soon the Nazis were bombing England, so the US geared up industrially to help the world, and everybody knows the end of that story. Both Hitler and the

Imperial Japanese were defeated by the US and its allies. The US became actively involved in the fighting after Pearl Harbor in December 1941. *And thanks to women who joined the work force: Rosie the Riveter and millions of others who helped build the ships and airplanes and bombs and bullets plus the service they gave to win that war. So the idea of supremacist's control of the world lived on in the minds of the Bushes and the new CIA with Nazi influences after they killed JFK.* The combination of hard to locate *covert* operators with intelligence training offered a subversive force within the US that targeted our nation and the world for takeover, during peacetime. The influence that Washington DC congressmen and government employees at high levels, must have fostered the idea of strengthening the covert grip on the US government, and with the freedom of executives in government and military to appoint people to run their endeavors, ***this cult-like monster was born!*** And JFK was the first president that needed to be taken out to continue to allow stronger bonds with industry and a stock piling of wealth to grow the covert conspiracy quickly <u>to take over the government for the benefit of private citizens.</u> Truman regretted forming the CIA after the JFK assassination. Participants included Big Oil, Big Banking, defense industries (e.g.Smith brothers and Howard Hughes) far right wing billionaire H.L. Hunt; and politicians who would work in the far right wing like Richard Nixon and Gerald Ford got support. *Prescott Bush owned Nixon for his willingness to be the maleable attorney interested in politics*, so he integrated well with these very rich power mongers, and since Dwight Eisenhower (AKA Ike) golfed with Prescott Bush, Nixon (through his flamboyant Commie hunting in congress and becoming a senator from California), got the call to be Ike's VP in '52.

Ike would have won with Walt Disney as his VP in '52, resulting in peace and prosperity and a celebration of life for all.

JFK was planning to cut Big Oil's "Oil Depletion Allowance" and make a Central Bank for America and ditch the privately run Fed. *These intentions in Oil and Banking were needed to strengthen the Federal Government and cut back private sucking on the Federal money pipe.* Both Big Oil and Big Banking would *covertly* participate at the top level in the assassination of JFK. They both looked forward to even greater crippling power over the world with these private controls.

The tripling of gas prices in the early-mid 70s came from a 3% decrease in the supply of crude oil; *whatever algorithm they were allowed to use, implemented highway robbery. The banking scheme to make stock on real estate was bogus from the beginning,* as lenders held 1st position. So the crash of 2008 was expected and rich banks should never have been bailed out:

$700,000,000,000.

(with no stipulations). A crime against We The People.

That *is idiotic!* And *it proves national control by private rulers before Obama.* So Big Oil needs to be National Energy (among nations) with banking regulated by governments everywhere. CIA/Homeland Security need to be under presidential / ***People's Representative*** joint control. They lie and cheat and likely use (drug/human) smuggling for black program income. That needs to cease with illicit drugs availability. In the 60s another scam was invented to suck rare natural resources from poor countries by bating them with economic improvements enabled by improved infrastructure to grow into major producers for the world with major industries springing from the new infrastructure. Like all construction projects, problems occurred that required modifications in specifications to fix the problem. So costs went up and before you know it, the foreign nation has more costly infrastructure with larger monthly payments than expected. And the new businesses did not produce what was expected from the US corporate estimates in their proposals. So this giant shell game steals from poor nations. And we sense the nation's frustrations so the US Company that built the project offers to make payments to the International bank in exchange for the poor nation's rare natural resources (at cheaper exchange rates?). The foreign nation does not get the growth they expected and becomes stuck in debt while exchanging their valuable resources to make payments on that debt. Complicating this relationship the government of the small nation gets involved in negotiations and bribes or threats are used by the US to get what it wants and, if not, to send in the "Jackals" (CIA covert killers), if the country reneges on any of its agreements. *The book "*Confessions of an Economic Hit Man*" by* John Perkins, *copyright 2004, explains this business in much more detail than my brief summary,* and the US Government has continued to do this around the globe, necessitating the placement of US troops into 130 foreign nations.

<u>Stop this crime and bring back our troops.</u>

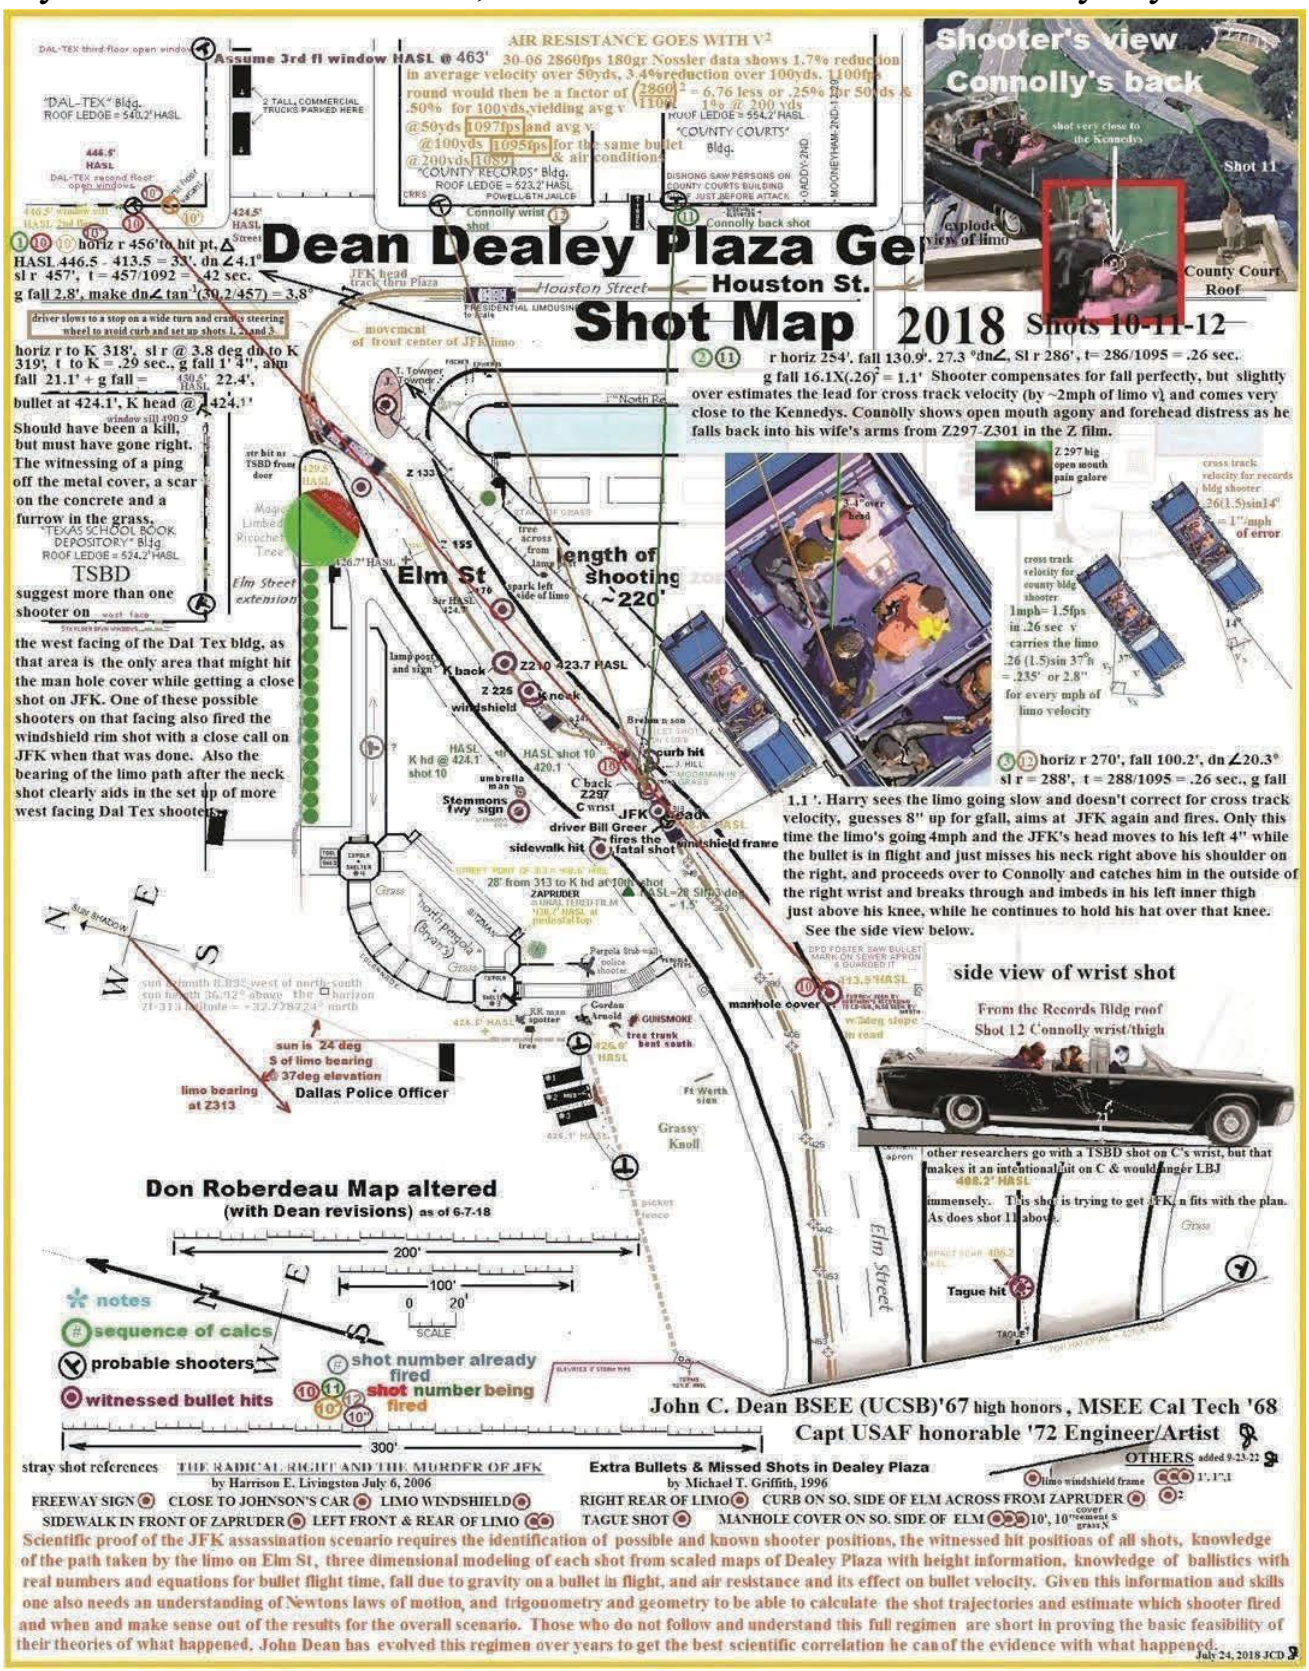
In the courts, we need a complete overhaul of the law to enable justice in the first place. Facts and deductive & inductive logic with these facts should be

used to determine guilt, not a jury of peers (who may be bought, or who are not logical enough to sort out the facts from their biases or their momentary likes and dislikes, threats or bribes. And precedence in law should not escape logic/fairness either. Stop the current fairy tale justice system and institute one based on truth with facts to support (and testimony), using logic with acceptable premises. And base the law in moral principles of right and wrong as should be the custom.

Getting back to the JFK Assassination we need to complete the shot calculations for the remaining 7+ shots. The next page shows shots 10, 11 and 12. 10 is the set of shots (10, 10', and 10") that hit the manhole cover, the concrete pad south of the cover, and the grass north of the cover. These 3 shots required 3 shooters on the west facing Dal Tex building as discussed earlier. The misses were either due to lack of gravity compensation or scope/operator error. 11 and 12 were vulnerable to cross track velocity while the bullets were in flight. Both errors are easy to understand when one looks from the shooter's perspective at the target. I provide the art that shows the view of the County building shooter when he accidentally hits Connolly in the back. He probably led JFK by ~2 inches and caught the governor in the right armpit on his 28 degrees down angle, causing the same angle wound before exiting below his right nipple to hit the floor in the limo. Connolly showed intense pain with his open mouth yell at Z 297 as he faced Zapruder and was then hauled back by his wife onto the floor. The bullet was on the carpet.

The wrist shot was almost simultaneous from Harry Weatherford on the Records building roof, as in the geometry (upper right and lower right (next page) while the bullet was in flight. The amount of limo motion at 4mph would move the shot over JFK's right shoulder and hit Connolly's wrist as shown in the equations:(upper right view of the 2 cars on the next page). Harry compensated for fall due to gravity pretty well on this shot, after hitting JFK in the back earlier while ignoring fall due to gravity. In his defense, he was used to firing 2850'/second full load rounds that would have killed JFK on his back shot #7 with less fall and earlier arrival to his head where he aimed. But with his sub-sonic rounds he was a full 4 mph off on limo velocity that moved the limo 4" left so his bullet went over JFK's right shoulder near his neck when it reached the limo and hit Connolly again by mistake. *Connolly was definitely not a target. He was LBJ's best friend.* But you can appreciate this analysis for its thoroughness and accuracy in showing what was the probable shot sequence on JFK that day that produced the results

witnessed. My work on this is painstaking and I haven't found any errors to negate it. I'm only writing what I believe to be the truth. So far I haven't made any errors that I'm aware of, that bias the rest of the shots in anyway. I'm



going in sequence of where shooters could have crossed the path of JFK's head (in the limo) as it progressed through the Plaza one shot at a time as he forwardly passed from the top of Elm Street to the underpass ahead, while minimizing any collateral damage to spectators. It's obvious, though, that subsonic rounds were more susceptible to error with limo motion than the high speed bullets. JFK also slid right to left toward his wife on the rear bench seat as if to avoid being hit near the top of the street where a big flurry of shots assaulted him from the Dal Tex Building to begin the siege to kill him. He may have gestured angrily to his wife right after the neck shot as if to say *"all of your BS about firecrackers and ignoring my back & neck hits shows total limo group complicity in this"!* I created this cartoon, left side pg. 40, to show how JFK publicly embarrassed her and how she may have reacted. He had the weakness of his father who defiled his marriage with Jack's mother so Jack was ill directed in his youth to think that this continued to be acceptable behavior for him. Jackie's agreement to support the murder in a "kindly sort of way", seemed less evil. They were going to kill Jack regardless of her actions and mysteriously she survived the barrage of bullets and got her wish.

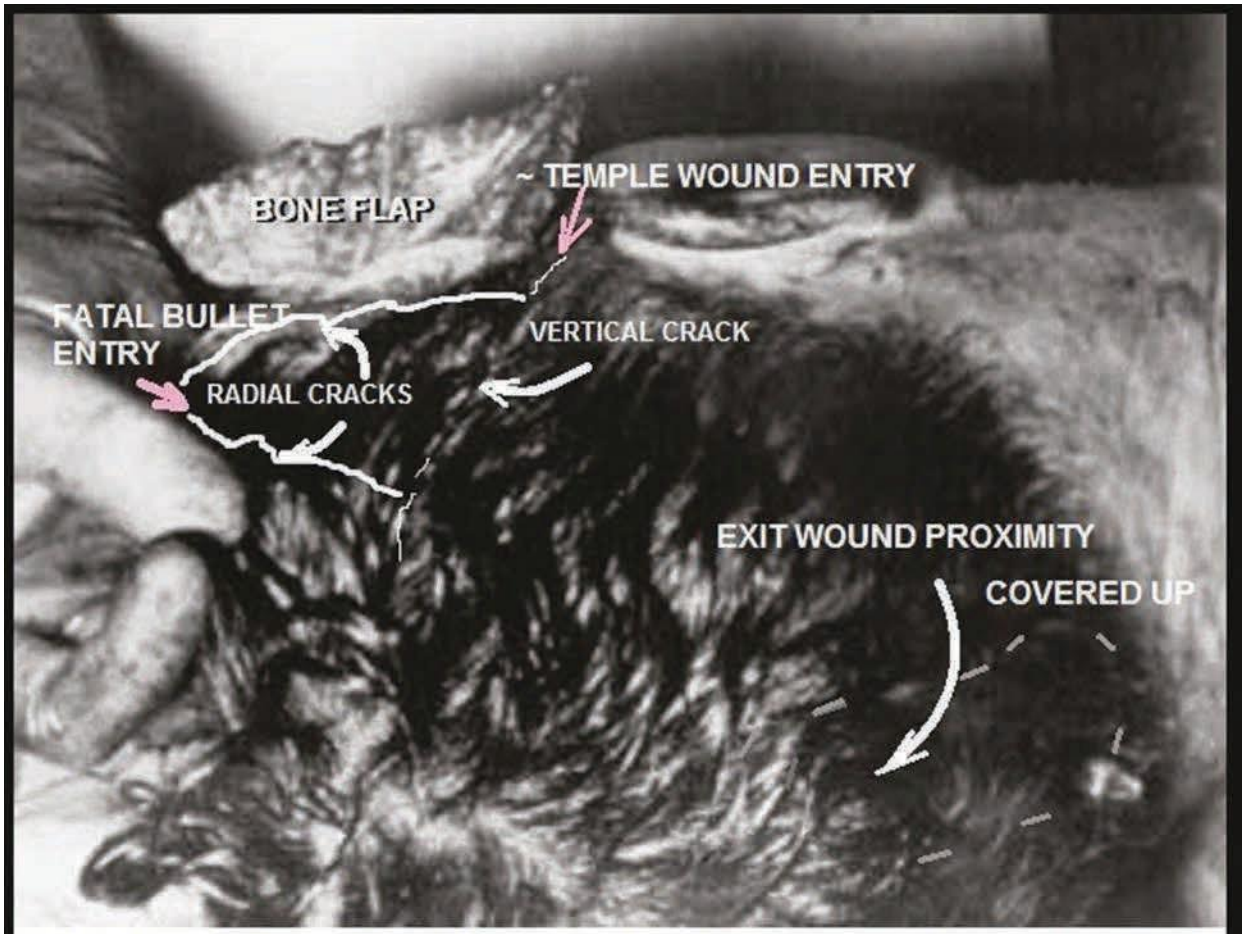
This'd make an incredible movie, especially with the actual shooting sequence and sympathy to Jackie's situation. The world should see such a movie

I also found in my research that slightly different pictures of events existed on the internet. I suspect that loyal patriots working as techs in the CIA photo lab would sneak out basically clobbered photos of the president at his final moments. But they gave sneak views in different photos with bits of evidence as shown in Cover Up and Release on page 41. I show the sequence of right temple hit in shot 13, smoky loud shot that missed and hit the curb on the south side of Elm near Jean Hill in 14, and the fatal shot from his driver that he saw coming 15, and put up his right fist, his only defense against this brutal attack to try to block the fatal shot. The temple shot came from police officer Roscoe White, who became active at the Dallas police station about 2 months before the assassination. He was a braggart and claimed that he fired the fatal shot. It might have been over time but #15 caught JFK in the right forehead

near the hair line as Kennedy was slightly cowering down left while looking at Greer when hit and the bullet, a special low caliber sabot round backed by the full 45 load of gunpowder caused a concussion wave that blew out the lower back of JFK's head 2.5 inches wide by ~4 inches vertically and killed him instantly, The narrower, lighter bullet would have greater muzzle velocity than one of his 45 rounds out of the same gun, and it's this higher velocity (squared) that creates much greater energy to blow his brains out. Lower caliber, higher velocity rounds have more kill power.

At the autopsy a triangular flap in his skull is bared on the right side due to wound alterations done at Walter Reed Army Hospital before Bethesda. It didn't show in the Z film well but a lot of his skull was shattered by the fatal sabot round. The Army doctors at Walter Reed did a quick brain removal on the right side by cutting through flesh to expose the shattered skull and then working the

3/4th brain out of their entry post mortem wound, because when the body reached Bethesda in an army ambulance, Paul O'Connor, the Navy corpsman responsible for doing the craniotomy saw that JFK had no brain. Paul saw JFK's head as shown on pg 46. JFK came from Walter Reed in a plain gray shipping casket after doctors there enlarged his wound, removed his brain, exposed the Skull flap, and perhaps, removed some bullet fragments. Navy Doctors at Bethesda noticed post mortem surgery and commented about it in front of the 2 FBI agents present at the autopsy, who reported this fact in their reports to their superiors in the FBI. This immediately smelled of wound alterations to make the body seem to be a result of one devastating bullet to the rear of his skull that blew the gigantic hole, where they removed the brain at Walter Reed. A helicopter landed on the right side of AF-1 at Andrews AFB while the bronze casket was taken off the left side for transport by ambulance to Bethesda. JFK's body, which was stored in a forward right compartment on AF-1 was picked up by the helicopter and flown to Walter Reed to start the cover-up work on the corpse, while Jackie accompanied an empty bronze coffin to Bethesda. X-ray techs were taking the 3rd set of JFK head x rays to the lab to process when Jackie arrived at Bethesda. David Lifton, author of "Best Evidence", copyright 1980, figured all of this out with his interviews years later of techs Paul O'Connor, and the x ray techs, and mortuary rep who helped place the body of JFK in the bronze casket at Parkland hospital in Dallas. See his "Best Evidence Movie" of these interviews. I believe that the limo driver Bill Greer and his sidekick right front seat, Roy Kellerman, who requested 10 minutes alone with JFK's body at Parkland to "pay their respects," pulled the body out of the coffin and put it in a shipping casket and sent it to AF-1 for storage up front right as "some anonymous Air Force Lt Colonel's body to Andrews as well as the presidents body", to enable the spoof at Andrews to fool people into believing that the body was still in the bronze casket. This gave service doctors, both Army and Navy time, to alter the head wound and remove bullet fragments. At least 2 bullets penetrated JFK's head: the temple shot from the right and the fatal shot to the right forehead near the hair line from the front. But a cupola shooter had the *same shot as Roscoe White had* and Frank Sturgis thought he hit Kennedy in the head as well, from JFK's front right. A photo of the head at the autopsy

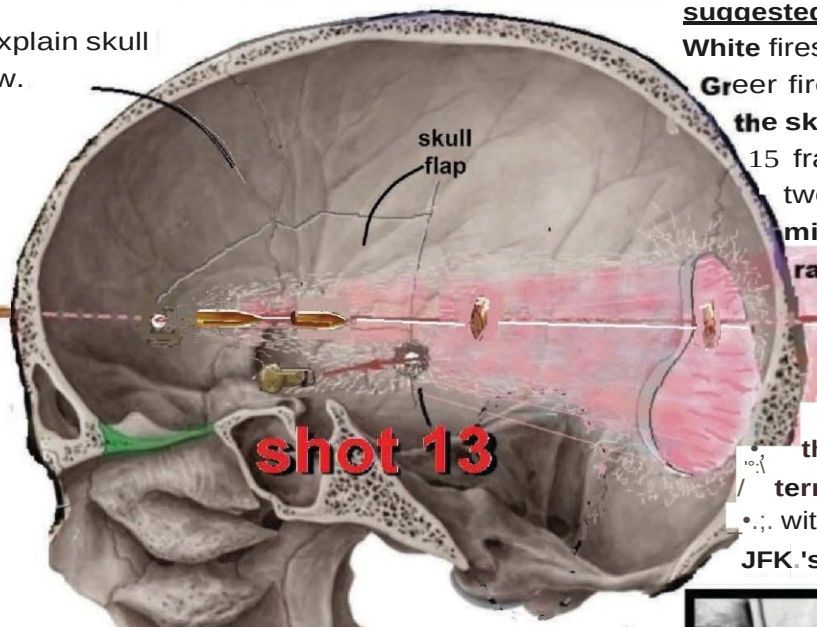


JFK Head Wounds, Skull Cracks, Bone Flap, & Exit Wound

shows the skull flap above. I composed a view of the skull to show how the flap may have been formed on the next page, which traces the sequence of shots that could have created the skull flap of bone that is shown above, from shots known to have happened, so it's plausible and, with no other explanation, the likely cause of the triangular piece of skull exposed. Also, there does appear to be a small hole at the bottom of the concussion blow out marked by dashed lines to show it as covered up by the government, although the wound doesn't show an exit bullet hole underneath toward his neck, we know that chunks went flying out the back onto the trunk of the car and over to Mr Brehm and in the face of officer Hargis and left a big oblong hole for the doctors to see at Parkland that shows in the back of JFK's head in Moorman and testimony years later at the house hearings when the nurses and doctors accounted for their memories of the exit wound as variations of a big hole in JFK's head. Crenshaw's memory seemed to be the most accurate in agreeing with Moorman's photo as I depict on the next page.

Dean art to explain skull flap below.

fatal shot 15



sabot round in Greer's 45

suggested sequence: **Roscoe White** fires shot 13 just **before Greer** fires 15. 13 **fractures the skull vertically while** 15 fractures it **along the** two radials **shown terminating on** shot 13's **radial to create a bone flap.**

This and **the rear punch** out **terrify any viewers** who witness **the explosion of JFK's head.** Instant **death.**

a national COUP

Other head wounds were **added** at Walter Reed in a hurried attempt to destroy **body evidence. An** ambulance then rushed his body to Bethesda to complete the fraudulent autopsy.

Jackie and the world were spoofed to think JFK was in th bronze casket she accompanied to Bethesda. But a helicopter picked up his body at Andrews from the right side of AF-1 and flew it off quickly to Walter **Reed.** X-ray technician. Jerrol Custer, at Bethesda, saw Jackie arrive when he was taking the 3rd batch of x-rays to the lab. Author David Lifton had filmed interviews with N avy JFK autopsy techs after the choke order was lifted years later. All the techs knew JFK had been shot from the front and all bullets removed. X-rays were taken to locate /remove the bullets so that body alteration could be done to pin it on Oswald. Separate back and neck shots were merged fallaciouslv by Gerald Ford in the final Warren Report.

It was covert coup

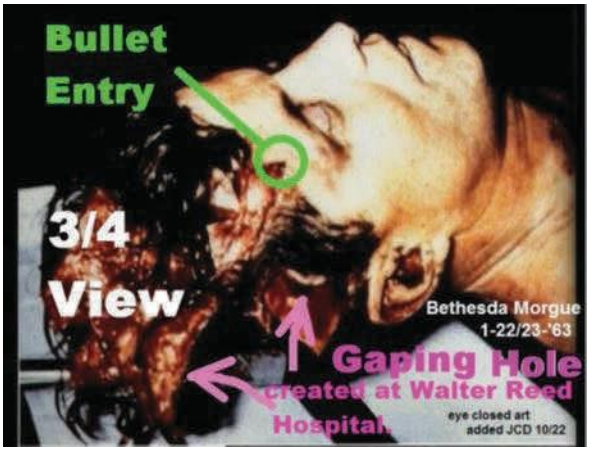
and support personnel we re ord red not to talk. But they did aft r th ord r was lift d bycongress. Th US was taken ov r by th vii monolthic conspiracy JFK identified in a speech in **April** 1961.

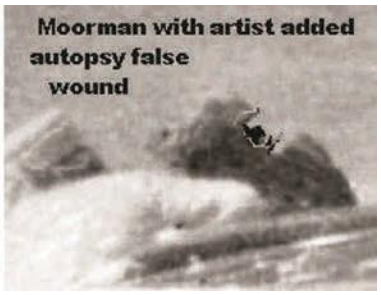
It p rsists and hasgo nt his day.

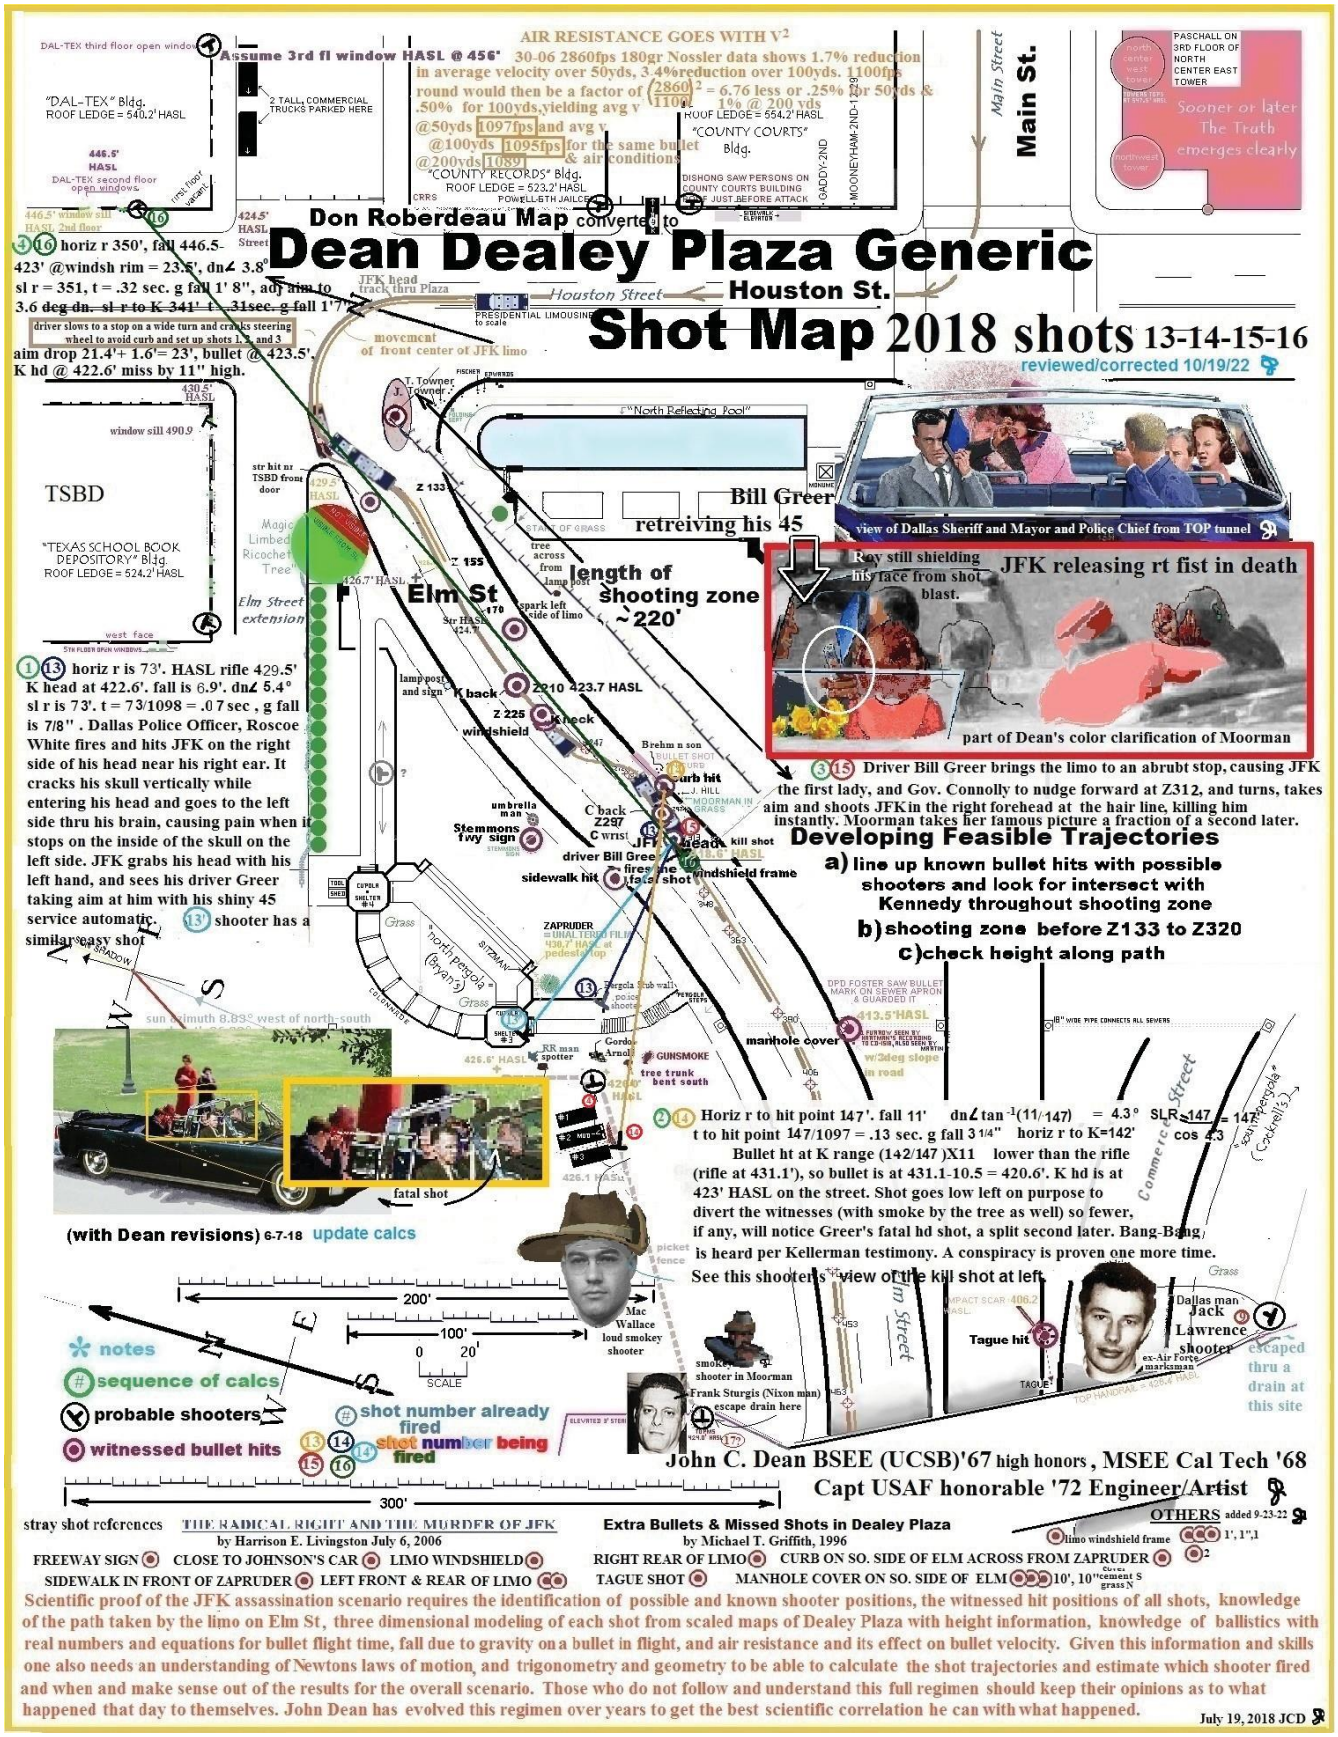
complicity: LBJ, Army, Navy, CIA, SS, FBI, BIG OIL BANKING THEN **ALL BLACK OPS AUTHORIZED GOVMT/INDUSTRY** NOW 2022

The CIA operates an Air Force of its own with dispersed airfields around the world, for covert transportation unknown to the public. While being necessary for placement of specialists with particular skills anywhere they want to, I believe that the CIA controls the international drug markets serving the US. This would be a very lucrative business in raising private funds undocumented by the government, but strictly for their use. So they have safe houses all over the world, where agents may seek rest and recreation. I believe that they also sponsor human traffic for slave/prostitute work for safe houses. On top of this they get their government pay, which, considering their risks, is probably in the James Bond range to enable socializing at any level. They have ways to invite themselves to parties so they may conduct business there as well. When I worked at the Naval Oceans Systems Center in San Diego in the 1970s I thought I was friends with a covert agent who had different female companions at the parties, and may have flaunted them in front of me to make me jealous. I am more of a loner for my peace and comfort. The only x-ray expert who has been allowed into the National Archives to study the x-rays of JFK's head is Dr. David Mantik., a friend of Dr. Fetzer. I was honored when Dr. Fetzer brought Dr Mantik into a discussion that we were having in emails. I never got any comments from Dr. Mantik, but I looked up a few references on his JFK radiology work and was delighted to hear of his discovery that *the bigger of minute bullet particles were found in his head toward the rear and the tiniest were in the front of his skull at post mortem. (JFK Assassination Paradoxes David Mantik) He concluded that JFK's fatal shot was fired into his head from his front, as the bigger particles have more energy due to their greater mass so they travel deeper into the brain for the same muzzle velocity.* Resistance goes with the square of the particle radius, while mass goes with the cube of the particle radius. Mass grows quicker than resistance. But it's velocity (squared) that dominates in energy so it goes deeper despite resistance. *Oswald could not have shot JFK from JFK's front as he was back in the Book Depository, behind JFK. So it was a conspiracy of 2 or more and Oswald was not a shooter. He was buying a coke in the lunch room on the 2nd floor and taking a break.* Officer Baker, in a test, stopped his motorcycle and ran into the Depository in 15 seconds. Roy Truly escorted him to the elevator (out of service) and ran upstairs to the 2nd floor landing, a total distance of ~160feet (about 50yards) in what? slightly more than 25 seconds at a jog? He saw Oswald through the window in the door of

the lunch room from that landing by 40 seconds total; not what conspiratorial law men harassed him to report: 90 seconds to 2 minutes. This is time past the 3rd loud shot. *And JFK was not even shot from behind in the fatal shot. So the whole 6th floor business is a pipe dream, probably set up to enable blame of Oswald if body alteration could make it look like JFK may have been shot from behind.* JFK died from the concussion that put his brain out of service instantly at the third loud shot from Greer. His heart was getting no signal from his brain to keep beating. The unit of blood, breathing assistance, chest compression were necessary precautions until his EEG was established as a flat line. And the techs needed time to attach the EEG sensors (the last thing that they did to confirm death). Finally in presentation of my shot calculations for shots 13 thru 16; please see the shot diagram on the next page. All the shots are when the limo is stopped by the driver. For shot **13** Roscoe White shoots from the stub wall on the right side of the Pergola as one is looking S and hits JFK in the right temple. Bill Newman and his wife were 20-30 feet from the limo; see the overhead view on page 15. The Newmans were close to an imaginary line between Zapruder and Mary Moorman on the north sidewalk of the street. Newman heard the back shot up the street toward Houston and saw JFK pop up and then he saw the temple shot, right in front of him, hit JFK from a blast from the knoll (to Newman's right and behind him for that shot). Newman shows up on the right end of the full Moorman photo across the street on the northeast side (not shown). He and his wife and Mary Moorman and Jean Hill all have intimate views of the temple and fatal shots from south and north of the limo. Charles Brehm, to Mary's right, saw JFK's hair lift up at the fatal shot and throw head matter from JFK to behind the limo in front of him. That has to be a front shot. Shot 13 was an easy shot for Roscoe White. JFK's head was torn open on the right rear at Walter Reed. The gaping wound was not seen on Elm; Therefore Bethesda got the open

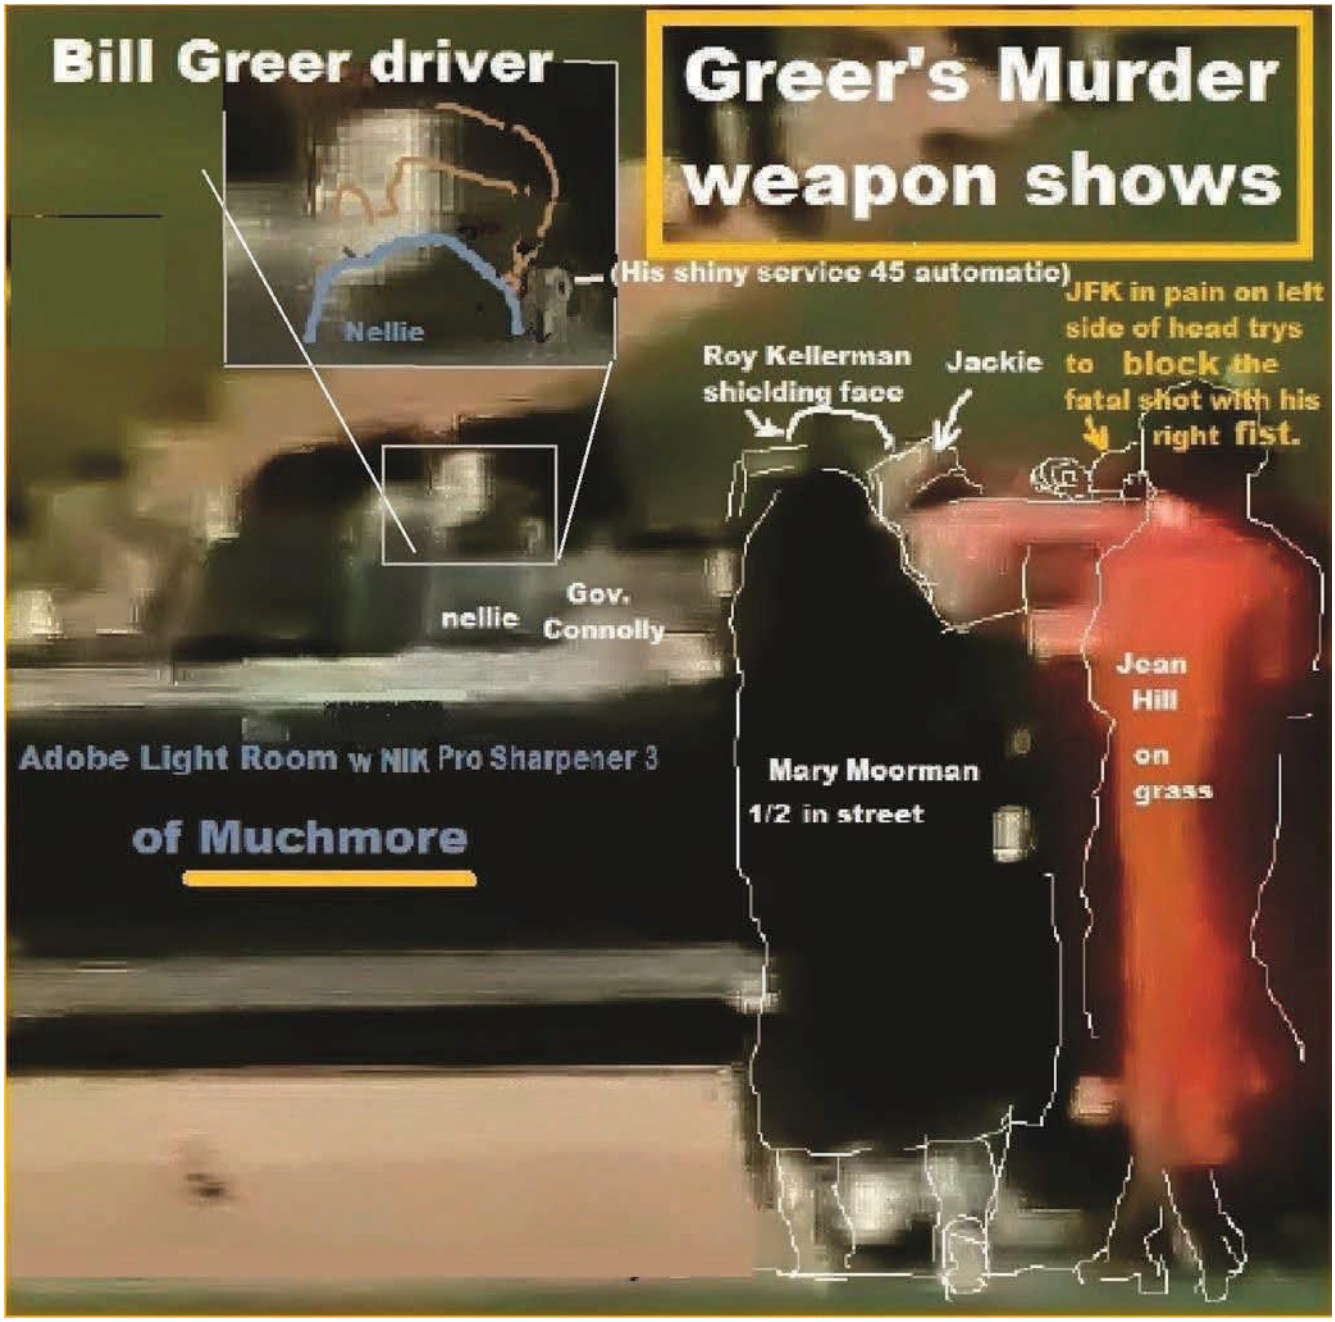






skull as shown last page, and would report it as the autopsy fatal wound. For the 13, 14, and 15 shots, I realized that the limo had been moving in the

Z film. But, in reality, it was at a dead stop for these shots and the map shows the hits as if the limo is moving (by the altered Z film with the conspiratorial moving background dubbed in before the edited limo group is added back, to spread out these hits). What becomes impossible is the bang bang between 14 and 15, the last two loud shots. The map shows 14 hit the curb near Jean Hill. Roberdeau shows a region about 10 feet long within which the curb was hit. This is near to where Connolly was hit. Then 15 is shown to have happened at the spot where street HASL is identified as 418.6' *They are too far apart!* In fact the allowed position of the curb shot makes 14 occur before 13 as we know that 13 and 15 likely caused the skull flap. The 14 bullet crosses where the limo is at the Connolly back hit (big red circle/ red dot) and we are led to believe by the Zapruder film that Connolly was hit before 13 hit Kennedy. Perhaps the direction of the 14 shot may have hit east of Jean Hill after Kennedy took the temple shot, also closer to the Connolly hit points with the kill shot there as well. The limo was stopped for about 4 seconds according to the Dallas Mayor's wife and Senator Yarborough, riding together back in the parade, and a stop would be a good time for all of the last shots. Both the Mayor's wife and the senator smelled burnt gunpowder when they passed the spot where the limo had been for the last shots, indicating a shooter in the limo, who left his smell there *in the still air* for any closely following cars afterwards to smell. That's consistent with the limo being stopped for these last shots. Many smelled the smoke as they passed where the limo had been for the kill shot, a Greer remnant. The smoke would linger for a fatal shot from a stopped limo, as in the still air. And all of the last shots except perhaps #16 were fired while the limo was stopped in front of Mary Moorman and Bill Newman. Muchmore captured the kill shot from the south lawn per the next page. Her capture of the kill shot is authentic for viewers on the Southeast Elm lawn; Orville Nix in the vicinity of Main St on the south side took a similar movie of the limo at the same time. Frames were removed by the CIA/ government or altered in appearance as it and the Muchmore film should have showed Greer shooting the president clear as day, while the limo was stopped, but the limo group was altered to fuzz out Greer and JFK to protect the radical right wing worldwide takeover in progress at JFK's assassination. And the background moving model was used to print the edited limo group onto a moving background for Muchmore and Nix and many others. I looked up the Nix film on **YouTube** and noted their versions had the hashtag "New World Order"



like they're the Bush family/conspiracy leadership side of documenting the Oswald kill. So they are cloaked in white and black smudges to hide Greer's kill of JFK, and seem to show that action, but with clarity lacking and against a phony moving background. But the red blood haze around JFK shows up after the driver blobs out and elevates himself slightly. Then the red blob around JFK shows up and then the blob of the driver turns back to his job of driving as soon as the red blood blob is seen well by the driver. Time coincidence suggests the driver caused the red blood blob. I'll bet that the elevation of the driver was done quickly to maneuver past JFK's defensive fist to get a clear shot at his forehead while aiming slightly down for the

lower right exit of the fatal shot. You've seen the re-processing I did for clarification to show the gun in the hand of the driver, pointed at JFK before and during the attack on him with no elevation shown in the Z film, and the exact time coincidence of the speed blur on the drivers head during the same 1/40 second open aperture of frame Z313 on JFK during the one frame of the kill shot that Zapruder shows the red explosion of JFK's head in his film (in one frame with the other 20-40 frames of the same removed). One does not need to be a rocket scientist to catch the inference of the driver killing JFK with that or the Nix blob views of the same thing. The moving blobs are known to be the driver as they morphed from the driver to become blobs and morphed back into the driver after the red blob on JFK shows up, & and heads for the underpass. The driver rising up for the shot indicates his effort to evade JFK's fist on the fatal shot and makes it come out low back of JFK's head as it did. I revised my "kill art" (rear pages) of the fatal kill. Many frames are removed for the 4 second pause for the kill and for the whole long slow wide turn business at the top of the street with another pause besides: maybe 10-15 seconds total. Real time responses from the crowd are also removed of any horror shown by the crowd to what's happening in front of them. All films together seem to lack the reality of this horrid event. I'd bet there was a fair amount. The "Couch film" shows pandemonium at the corner of Elm and Houston while officer Baker is running toward the TSBD, and ***traffic is stopped.*** And Police and FBI questioning and false statement preparations that many witnesses were hassled to sign but wouldn't sign at the police station: what about them? I also decided to study the strange sparkly gun return from Greer back to Kellerman of the murder weapon that Kellerman puts into the glove box after the hand off at Z 318. That one frame cannot even be seen in the running of the Z film, but was left in by patriotic techs So I got an accurate picture of the dashboard of the Lincoln they were in and studied it for placement of shadows caused by obstructions inside the limo of the light from the sun and reflection points in the limo of that sun in Dealey Plaza that day. Roberdeau gives us the sun angles on his map. So I modeled a 45 in the left hand of the driver being passed to Kellerman and ran it thru a speed blur in Paint.net and sure enough got the same shape as the object shown in frame Z-318 after the kill. The 45 was in the slide locked position after firing the last (only) round in the 45, the sabot of a low caliber, (narrower and lighter) killer bullet designed to blow a huge hole through his head with its compression wave.

I show the shadowed region of the area near the opening of the glove box which shows how much of the 45 was in shade vs light (next page). At this writing I found the left hand of Kellerman holding the glove box open while Greer passes his 45 over in his left hand so Kellerman can cradle it with his right hand and put it straight into the glove box. The lower edge of the glove box has some shiny metal trim in the limo photo, and that strip is caught by the sun when the glove box is opened by Kellerman, with his left hand outline

showing as I drew it (next page), holding the glove box open with the extra line of sparkle from that trim, to put the 45 into the box quickly with the pass from Greer. I figured that the pass was at about 10mph and that should show ~3 frames to get to Kellerman, but only one frame survived the Limo group edit outs, so one doesn't see the motion of it. But I studied the Z film one frame at a time for stuff like that. And the patriotic photo tech who left it in is a hero who defied his superiors to preserve the truth of what happened in more detail, even if it was just 1 frame. God bless that patriot. I'll bet ~10 or more frames were removed to try to bypass this " hide the weapon scene", preserved by Z 318. Over the years with communications very infrequent with anyone from the JFK research community, I remain friends with John Costella, and presumably, David Lifton, and Dr. James Fetzer. And they all have one thing in common. None of them have supported my study of the shots nor my conclusions therein. The community came around on my contention that Connolly's chest wound was fired from the roof of the County Building and both my visual and the measured 28 degree bullet down angle agree with the facts of his wound angle measured by his doctor at Parkland. So I've developed a theory. You know how people seem to be familiar with stories about thugs coming to the homes of witnesses and threatening them to remain silent on what they know about certain things that the thugs threaten them not to talk about. So the people pretty much shut up. I have a suspicion that that group of people in the JFK research area who have figured out the conspiracy and know some names of bad guys, have indeed been threatened to shut up.

So in the process if a new researcher figures out certain facts and wants to coordinate them, most researchers, who have also been threatened won't agree with something truthful that the new guy presents for coordination. And their reason is two fold. They don't want to rile the killers who have threatened them, *so they stonewall the new guy for his safety and to meet the silence requirement that was imposed on them and is what they live by.* This fear, I believe, is rampant in the US. People are just too afraid to openly discuss the failures in the government to fully tell the truth on JFK as the unseen forces from the conspiracy may decide to kill them in order *to stop the spread of the evil truth. The problem with this fear is that a small group of extremely greedy and evil controllers can steal from the government for years while the debt keeps going up. They'll keep doing it until they are killed or stopped themselves. I believe in pursuing this suspected conspiracy with gusto and to play their game against them to put them under as quickly as possible and to recover the trillions to pay off government debt, while removing the people responsible and jailing them. In the process pressures may be applied to suspects to get them to give up names of connections and any proof of their bad doings. One might start this campaign by capturing G.W. Bush and putting him under truth drugs and alcohol as needed to start filling in the top structure of this horrendously evil system. I would round up his entire family and do the same with them. As word gets out on these people's discomfort, start a new program of enticement to cooperate in pay back and filling in names for minimum jail sentences, with a short time limit on the offer. People in the Black World who are known to be patriots with impeccable records might assist in the round up of executioners and bad judges for the same treatment. Trace the money and cut off the flow to the bad guys. Follow the job appointments and follow-on job appointments of the appointees ad-infinitum. Whistle blowing should not be against the law. It enables justice to happen. Government laws against it allow crooks to skate justice due them. Allow it and with it, clean house, and put the crooks in jail, where they belong. Those opposed are for the collapse of our government and are spineless. Deals for less time are used all the time to entice those who won't talk, to talk and make things clear, with truth and justice as the motivations. We should expect the bad people in government to want "Whistle Blowing to be a crime" to freeze out the "goody two shoes" in government so the crooks and traitors may stay in power within the government. We need the true patriots who support the truth to be loyal to "We the People" of the*

Constitution. The people have been suffering for 43years with the collection of US debt that they are not responsible for. The crooked people in positions of control within the government are responsible with the forces outside of government who benefit from government debt. We the People need a *People's Representative* in Congress with ~20 % of the vote on bills who mans the government (personnel managers and their bosses) for the people so no appointments are made by the "Croney System" to ever favor management over the people in our nation again, nor run deficit financing ever again and to operate on moral principals of truth and fair play and to tax only those who can afford to be taxed to fully fund our programs each year. I believe I've proven scientifically how JFK was killed so with a few notes, a poem, my connections, my list of books reviewed, and the debt pile shown, let's wind this thing down.

The Final Coordination

The evening of the 21st of November 1963, Clint Murcheson hosted a party at his ranch for key individuals in the management of the assassination planning. Guests in attendance included Richard Nixon, GHW Bush and father, J. Edgar Hoover, and LBJ. After dinner a meeting was held where the "go ahead" was given for the assassination the next day. LBJ, who brought his longtime mistress. Madeleine Brown, came out of that meeting and announced to Madeleine in a loud voice:"*Well, after tomorrow those SOBs won't embarrass me anymore*". She took that as possibly threatening, but on the next afternoon, she was convinced that LBJ had something to do with the Kennedy murder; and over the years since, she was filmed in interviews (probably after LBJ's death), and at the time of the kill she got him to respond to her accusation that he was involved. *He said the CIA did it;* which has quite a bit of truth to it as they knew JFK was planning on reducing them to intelligence gathering only with no more military type operations. This is a result of the Bay of Pigs debacle hosted by the CIA. JFK fired Allen Dulles the 1st Director of the CIA and the general in charge of their "Air Force" for the invasion, whose brother was the mayor of Dallas who sanctioned JFK's assassination. JFK was hated in Dallas for his racial equality/integration stand. All law enforcement officers in Dallas were required to have membership in the KKK or the John Birch Society. They're all committed to racial killing support, discrimination, and supremacist philosophy. Both officers in the assassination, Dep Sheriff Harry

Weatherford and officer Roscoe White of the Dallas Police Dept. got hits on JFK that day. CIA alone wouldn't stand for him to have another term. The Murchisons partied for a week after JFK was killed. Their maid and chauffeur identified attendees later. Roscoe White bragged openly that he killed JFK and he wrote it his diary and shared that with his son. After dad died the son called the FBI and they came and took the diary.

<u>Bad Guy Witness on 11-22-63</u>

A photo was taken on the 22nd showing a man who resembled GHW Bush on the steps of the Book Depository front door. See pictures below. On a trip to Dallas in 2011 We visited Dealey Plaza my wife took pictures of me on the steps of what used to be the TSBD. It showed the man to be 6' 2" which is a match to GHW Bush. He was debriefed on JFK per the memo on page 56 on the next day. He denied it. But the only George Bush on CIA records was support. And to become Director one needs a lot more experience, and he had it. *Somebody's lying. GHW Bush is my call***.** His sponsor for the presidential primaries in 1980 was John Hinkley Sr. When Reagan got the nomination, it was 6 weeks after his inauguration that John Hinkley Jr., GHW's sponsor's namesake son, got a security pass to be there on the street and shoot at Ronald Reagan as he departed the building by his Secret Service

Date: November 29, 1963

To: Director
Bureau of Intelligence and Research
Department of State

From: John Edgar Hoover, Director

Subject: ASSASSINATION OF PRESIDENT JOHN F. KENNEDY
NOVEMBER 22, 1963

Our Miami, Florida, Office on November 23, 1963, advised that the Office of Coordinator of Cuban Affairs in Miami advised that the Department of State feels some misguided anti-Castro group might capitalize on the present situation and undertake an unauthorized raid against Cuba, believing that the assassination of President John F. Kennedy might herald a change in U. S. policy, which is not true.

Our sources and informants familiar with Cuban matters in the Miami area advise that the general feeling in the anti-Castro Cuban community is one of stunned disbelief and, even among those who did not entirely agree with the President's policy concerning Cuba, the feeling is that the President's death represents a great loss not only to the U. S. but to all of Latin America. These sources know of no plans for unauthorized action against Cuba.

DEC-38 62-109060-1396

An informant who has furnished reliable information in the past and who is close to a small pro-Castro group in Miami has advised that these individuals are afraid that the assassination of the President may result in strong repressive measures being taken against them and, although pro-Castro in their feelings, regret the assassination.

The substance of the foregoing information was orally furnished to Mr. George Bush of the Central Intelligence Agency and Captain William Lokkes of the Defense Intelligence Agency on November 23, 1963, by Mr. W. T. Forsyth of this Bureau.

secured path. I wonder how he was able to do that? Right. Vice President Bush cleared him.

This Bush dynasty: Prescott, GHW and W have to be senior devils in the worldwide Rad Right Wing takeover. Nowadays Hinkley Jr.'s a free man despite his horrific shooting spree. He got well from his insanity and somehow lost his criminal guilt too. And ***Sirhan Sirhan, who was hypnotized (by CIA MK-Ultra mind control experts)*** **into doing and forgetting his attempt on Bobbie Kennedy, still rots in prison. And he didn't even fire the fatal shot**. Lies and Racism enable such injustice.

Hinkley got a better deal.

This is prejudiced justice under the law, not equal justice. There is no equal justice under the law when money or power buys better outcomes in the US and elsewhere. Make Sirhan Sirhan a free and rich man for recompense on abuse by government. I believe that we're all equal in God's eyes and loving neighbor AS SELF, the second commandment of God, backs my belief and should rule in society, which would respect the first inhabitants and not allow their removal from the land. God would not order love of neighbor AS self unless God meant it. The might business enables slavery which is detestable. And all people who have been abused by might, may get their 100 fold recompense in heaven hopefully provided by the tamed evil brute forces that caused their distress on Earth; 100 times the pay back. I'll bet that God doesn't provide this as there is no lesson for the Brutes in society. They may need to get "treat AS SELF" burned into their hides with 100 X amends. It is this mutual respect and lack of push that a peaceful community strives for. It's like the FHB (family holds back) rule for when unexpected guests arrive at dinner time. I was taught this as a boy, and my daughters know this.

As an engineer and an artist I decided to study the US economy, medical care, and the JFK assassination in 2008 and take an early Social Security retirement with less pay. I consolidated my information into books and movies. My JFK movies and lots of my music are on my YouTube channel at **https://www.youtube.com/channel/UCkoLi-V9FZSy4EFVRUCr0vA/videos** - Browse and have fun- **Download my books on free-ebooks.net after registration free. Do author search, John C. Dean**, 4 books including this one may be downloaded. US economy: A Beautiful Mind (With a Big Mouth?), Autobiography: Seeing the Big Picture; US covert conspiracy:

Common Sense Revisited pamphlet, and this one: previously titled **JFK Assassination The Last Book**. Visit my website to read articles, watch segments of my JFK movies, and download books/movies/radio broadcast. www.peaceandprosperitypath.com Any warning beyond adult content is bogus. Some force ruined my website and an IT man worked hours to recover the remnants. I don't have the energy to make it attractive anymore. I'm 78.

My poem is next which summarizes what I've been talking about, but in fewer words and with some rhythm to it. Please share it and this book. My auto-bio is truthful and shows my warts and all. I am open and only regret a few things in my life. All things said, I'm a good man, and have faith in God.

The Inertia of Money and Lies

John C. Dean 5-2-20 with corrections

The system, you know, changes so slow
that runs your and my life.
And it's not to improve the lives of us all
but to push us toward fear and to strife.
Cause greed n lies force the poor seed
to be strange fruit up in the tree
as it was sung, by Lady Day
eighty some years ago.

Cause nobody spends more than take home
'cept for the system above,
creeping along, taking out loans
passing the payback along.
It may seem berserk, but industry worked
to get in this government tree

where they appoint from their "jerks",
those who will do what they say;
to fill the choke points, to choke or to run
the system the way that they want;
while keeping strong ties to industries' eyes
and government workers to taunt.
So it's government, seeded with industry,
run in reverse.

It's a private force with links worldwide
and knowledge in every field
that doesn't care, how overmanned;
they bloat the departments with glee.
Cause that's a bill they won't pay.
When it's all said and done, they'll just flee.
I call it Black Cloud, the covert international fleece by the rich
that's ravaged the resources on Earth
to increase their self centered worth,

while leaving behind the poor and the blind
and not sharing their find with all mankind,
but destroying the power of governments installed,
to protect our equal rights.

This greedy double whammy defies the spiritual rights of our founding in equality
guaranteed for all, and life, liberty, and the pursuit of happiness,
Something forbidden to those below subsistence,
who die for loss of their needs.
The triple whammy comes with the carbon footprint, that threatens death
To the planet itself and too soon.

They infiltrate and make the system run for them.
This works great with deficit funding that adds
great depth to the national debt
to deepen their pockets and the hole we're in.
It makes industry rich for contracts they get
from governments, borrowing funds,
while having the nerve to say that the debt,
is something the people must earn.
So industry's day brings in the hay
while the government starts to decay,
with the people below on a steep ledge
fearing what's on it's way.

It all started in '63.
Johnson and Nixon and Ford were involved
with CIA Bush #1, in a business plan for Dallas,
to turn the nation around,
from peace and progress to war and distress,
just before lunch, in that town.

Cause murder's just business in Texas,
where they answer to no government.
so Governor Connolly did more than oblige.
He helped set it up for the hit.

He changed the fast path through,
to a right on Houston, and knew
it slowed'm then, and would slow'm again
with a wide turn left up ahead;
a dog leg left on Elm forced the first stop,
where fire began from the Dal Tex in line,
with the path along Elm, thru the back of Jack's head
who's far right, in the back of the car.
This saved hits on others in the limo
and hits to the crowds on each side.

How Jack missed this bee hive of stings so slow and so close
with the limo at rest, ... suggests a mole
in the plot, who adjusted the sights a bit off.
I suspect Oswald, himself, who was FBI n CIA
and part of the plot all along.
Only, he liked JFK.
Or maybe the FBI look alike program,
which he was in, had his twin lay down tracks
on the patsy he'd become later on.

and the limo traveled slow, and added another stop,
by the driver once more, after failure to kill,
by the shooters around,
with cross fire that just wouldn't quit.
Witnesses saw missed shots galore
with firecracker sounds n three loud rounds ,
and a puff of smoke on the knoll.
While the driver had stopped and turned again
to deliver the big hole in his head.

Most of the crowd heard the shots near the end of the street
So they rushed the knoll to find the killers,
but only found 2 Dallas cops,
one had a rifle, the other a gun,

but neither saw hoods on the run.

And no one ran to the depository
nor reported a shot from there;
except motorcycle escort Marion Baker,
who at Houston and Main, heard the echo off the depository
raced to the left of the backed up parade, to Elm,
where he left his hog, ran across Elm
and into the depository front door
with Roy Truly, the building super there.
Roy n he found the elevator stuck
so they raced to the first flight of stairs
in the back left corner and up
To find Oswald, relaxed, drinking a coke
in the second floor lounge back up front.

Truly verified his employment there,
so he wasn't a suspect at all.
Cause he didn't have time to search and to find
the hulls from his shots, on the floor,
wipe them down, stack the hulls near the window,
wipe the rifle down, move a bunch of boxes filled with books,
to get to the east wall, lean the rifle there
and restore the books
cause that's where the rifle was found.
while leaving his decoy Mauser up front
100 feet west at that wall and then,
he turned right with 100 more to the stairs,
he descends 4 flights of stairs, 80 feet, and races back up front
and right, 160 ft to the lunch room opening there,
where he finds his change fast, puts the coins in the slot, pushes
the button and waits for the drop, picks up the coke and uses the
opener, then walks back near the door
where he spots Baker and Truly in the opposite corner,
just getting to the 2nd floor landing of stairs
in the rear left of the building
having traveled one diagonal and one flight of stairs, themselves,
while Oswald blazed on his 3 times bigger ordeal, in less time?
At least that's what the Warren Commission needed to sell, only
minus the Mauser, cause it didn't fit into their plan.

Now Dallas Police and Sheriff's Deputies were told,
to stand down on his drive through the park.

And no law enforcement agent sealed off Elm,
to collect evidence after the crime.
Hence Dallas announced with this pissy response,
no desire to catch shooters that day,
as traffic resumed midst the deep gloom
collecting bits of his head in their treads.

But the mayor's wife and Senator Yarborough, too,
noticed the stop, and smelled smoke in the air
as they passed the spot, where the limo stopped
when they heard the third shot of the day.

But frame by frame still shows, the driver turn twice, and after
Jack's dead, resumes to the front,
steps on the gas, and out of the park he drives.
This alone suggests that a shot was fired
from close to within the limo where Jack expired
in the Zapruder film in all its bloody gory.
Only there's no stop for the fatal shot
just alot of jerky moves by the driver
from all the frames removed.

Well it took 12 years to see, on Hiraldo's show, free,
Only it doesn't look natural and the background scene
is not synced to the limo insides.

The fact is that the movie shown in public
is not the Zapruder original in camera film.
A CIA lab remade the film using traveling mattes to separate the background from the limo entourage,
remove evidence shown with the occupants as needed
and then rejoin the limo scenes kept, with another background
shot behind the limo, showing a constant speed
in passing the background as if the limo was moving,
and frame by frame, using an optical printer
concocting the new composite to look like a stroll through the park
a Hollywood trick of the time.
The team even speed blurred images shot at a stand still
to give them the in-motion look.

The Z frames do show a natural speed blur of the driver's head

at the same frame that Kennedy's head explodes as the abrupt recoil of Greer's .45
forced Zapruder to capture a blur
in progress during the one fortieth of a second shutter speed
of the kill frame and that frame alone.

This fact cinches the driver's guilt in the murder of JFK
if we can show the object he is pointing at Jack is a gun.
So what is that shiny flat topped pointy object,
that he points at the president as he is killed?
Well it's 8 inches long and flat on top, unlike any head in the car.
And in photos by Muchmore and Moorman as well
with Light Room focus and sharpening swell
it's the driver's 45 in Moorman, and the muzzle of his 45
next to his head as the shiny Z object in Muchmore, besides!
So the driver did kill the president as Zapruder also shows
And the three films from both sides of the street conclude.

Moorman shows the exit wound from his right rear
occipital lobe that agrees with Parkland medical reports
after the assassination and again in '75 hearings.
It's an exit wound with outward facing bone shards of his head, indicating a front shot, that came into his right forehead near the hairline, and points back to the driver.

The sharpening of Moorman also shows the president's left hand next to his head
on the left side showing his reaction
to another head shot near the right temple
that penetrated and stuck in his skull on his left ,
where he felt pain. This came first,
with Bill Greer (the driver's) fatal shot, following close behind.
A vertical crack in the skull from the hit on the right served as a stop, to longitudinal cracks from the fatal shot, creating a triangular skull flap. It is shown in the gruesome photos
of Jack's head in the morgue in Bethesda that night.
This was created by 2 shots to the head.
But that is not in the Warren report, which shows
only, the Oswald lie, n garbage to make one dose.

Moorman also shows his right fist up,
to block the fatal shot from Greer, to no avail.
He is brain dead in Moorman,
so his body flops to his left rear in response to these shots.
And his fist quickly flops with no motor prompts

left after the kill.
Counting the driver there are 4 shooters
in the Moorman print shown.
I enhanced the print with color to enable one to see
That there could have even been more.
There are 8 other shooters elsewhere:
4 in the Dal Tex building,
Deputy Sheriff Harry Weatherford on the Records building with a shot to JFK's back at T-3 and a bit later
to Connolly's wrist and thigh.
A shooter on the County Building hit Connolly in the right armpit from behind that came out his chest,
while barely missing the first pair in line.

Jack Lawrence, on the south end of the overpass
got JFK in the throat through the windshield
to his right of the rear view mirror.

And Frank Sturgis, a Nixon goon missed
from the north side of the overpass,
while Nixon's CIA man, E. Howard Hunt,
was paymaster for the team that day.
Nixon man, Ruby, with mafia ties, hit Oswald
in a couple of days, who was an agent for us
that Hoover set-up, to take the fall that day.
Cause Oswald's story would ruin the day for LBJ, et al.

Lt. Day, from the Dallas police took the Mannlicher rifle
to the holding site of Oswald's corpse,
inked his dead palm, and impressed it on the rifle,
and lifted the print which couldn't be read
and showed it as Oswald's palm print,
where it was accepted as evidence in the Warren report,
despite bad clarity in the print.

Over the years I worked and reworked the shooting scenario
to try to make sense of the facts,
of missed bullet hits, sequence of wounds,
slow limo path, shooter spots, and recently got
perfect agreement of all facts in the scene.

This is part of my story of 2019,

available for download free on
https://peaceandprosperitypath.com
My master of science and art skill reliance
gives me the edge on the rest in research,
my scientific mind helps me unwind
the big picture in all its detail
and show the calcs that have to agree
with a picture perfect view I draw
by sharpening of shots, enhancing with art
and using my logic, all day.

In 13 years of research, I've refined my understanding along,
and now success, I've unwound this mess
and everything fits tight and strong.
It's the best scientific proof of the true history
of our nation and the whole world, when
you wake up and smell the coffee, my friends,
cause I make the brew that is true.

So why was he killed you might ask?

He would've deprived how Big Oil thrived
on a depletion allowance, ….. jus' for them,
by evening the tax that all businesses pay
on net profit, alone, after costs.
But free billions kept with JFK dead
seemed worth this change in course
cause money and lies in murder they thrive
and Black Cloud has no remorse.

With overtime work for our booty call jerk
and respect for Ms Jackie it's thought
that SS agents ducked what he got
as his marital pay back was wrought,
while slowly driving Dealey Pawk

For Bay of Pigs vets and CIA Ops,
guns and explosives were fun
So they joined the Texans and the SS that day
to ensure the president was done.

Only things went wrong, so the driver stopped strong.
got his gun with one special round,

turned and fired past his fist, to the head
So BANG! Jack's dead

while Oswald sipped on his coke after lunch.
Hoover had him sole killer sans hunch
which LBJ pushed on Warren, the goof,
who reports a Phil E. Buster spoof

with 4 feet of reading, cold and aloof.
Ford did magic in the final debate
by moving a wound from T-3 to C-8.
But Nobody noticed cause of no pics
til Zapruder appeared on Rivera's hot flicks
12 years later we get shots from front right
moving Jack's body rear & left tight.
While CBS Rather saw, 12 years back,
the body go forward on *his news "act"*
Now the first report of the president's death
was from Martin Kilduff, white house press,
who said what he heard from Jack's doctor
"it was a simple matter of a shot to the head"
as he pointed to *his* forehead instead.

Then military costs went up 240 Billion
during what would have been Kennedy's 2nd term,
while LBJ's war in Vietnam killed 55K, just for fun:
one very close to home, and friends since age seven,
Army Lt. Vincent Edward Duffy Jr. was sent to heaven;
in what Nixon would call an honorable peace, later on.

RFK was killed by a CIA hit
for Nixon's climb to the top, and Sirhan Sirhan
is an old man, locked up where he doesn't belong,
cause Bobbie's death blow came inches behind,
with Sirhan pinned to a cart, 4 feet in front.
L.A. Police, Coroner, and DA abetted this ruse,
and ignored the kill shot that couldn't have come
from Sirhan pinned out of the kill zone.
But CIA programmed Sirhan's mind to be the patsy that day.

Now strangely enough Nixon was hired
by GHW's dad for answering his ad
for a malleable mouth, in law, & he was so glad.

Prescott Bush and his banking cronies
backed Nixon for congress, their puppet phony
who won and pursued commie hunting for press.

Now Bush shot golf with Dwight and talked
about him running with Tricky Dick for fun
and the republican candidates for '52 won.
They won in a landslide of electoral votes.
With Dick riding high on Ike's coat.

Meanwhile LBJ rose to majority leader in the senate,
so he and Ike ran the country for 6 years, together.
Big Oil owned LBJ for the money they paid him.
while CIA had their black Ops for fun
and pushed their Bay of Pigs on everyone.
Nixon was the white house lead for this and OP 40,
to have killers on hand for use in special OPS
that Sturgis & Hunt would lead from close up

Hoover had smut on Jack's chasing rut.
So his friend, LBJ, got the VP spot
to run with Camelot in his ‘60 election
to take over his spot before the end of his first term of work.
LBJ was way more powerful in the senate
so VP was a step down, that only Jack's death could avert.

LBJ and Bushes had friends who wanted Camelot out
and both Howard Hughes and H.L. Hunt had the cash clout.
LBJ's voice, Ed Clark, and his man, Mac Wallace,
would organize and plan it out.
while Dulles got Intel and SS ready and fit
So Allen could hit, with John Foster, at State;
2 brothers who'd do for themselves
while helping the worldwide plot
move forward, they thought, smoothing a bump in the road.

From Nixon came Ford who pardoned his lord
and chose Bush # 1 for CIA gun
for national fame at no cost.

Then the GOP found their winning ticket with Reagan
and spoiled Carter's Iranian hostage save

helping Reagan to be the star of the day
Then Black Cloud with CIA Bush scared Reagan out loud
with the son of his primary sponsor firing at Reagan as he got in the car
So Bush could threaten some more if Reagan didn't follow his plan
to start the debt demise to enrich the private business sector
with cash contracts for these private pirates.

The hit failed, but it's clear from the details
GHW could run the country from behind the scenes
on fear, with the ego driven actor out front,
helping business to squish workers, with lopsided pay all day.
And down sizing has continued to this day
with their protector governments broke, in disarray.

I still say A Beautiful Mind can make it better for all
without depriving the lives of the rich.
But there has to be trickle down of the wealth and income to enable
a celebration of life below
While human population is reduced through natural attrition
while preserving DNA and increasing habitat size
with extinction avoidance by animal population increase.

And energy production must become non-polluting:
solar and wind and water electric with storage cells proliferating
while fossils fuels are left in the ground, unless used in the air

The world's water sources need to be cleaned up,
of poisonous chemical rot, like plastic and oil and fish nets caught.
We need balanced budgets that include debt pay down amounts
for every country with a debt, by constitutional clout.
We need recall by the people of any government worker.
By a Peoples' Representative in congress who has
20% of the vote, while staffing the government with its workers
who profess support of "We the People" first, then bolster fewer above.

We need government press and TV to introduce
candidates to present their platforms and become known.
We need to eliminate lobbies and restrict private donations
to modest amounts, with no donations in behalf of;
so election to government positions is not
influenced by businesses, pacts, or big donor dollars.
Non partisan Volunteer Election Committees could have detailed
guidelines for each position that require real answers to every item.

before a candidate is allowed on television.
These are just some of the goals I see,
many more are in :"A Beautiful Mind (With a Big Mouth?)",
free on my website above.

I hope you're energized to check this out,
to see how it makes sense to you.
Cause I believe we're all goin' down,
if we stick with the boss men above,
who murder and rob, threaten n extort
lie and deceive and act without love,
to deny us a share of their claims on Earth
while killing the planet itself
and ignoring mountains of debt.
If God loves our neighbor as much as ourselves,
God loves all kids the same. And we all deserve
equal shares of what God made: Earth's bounty by name.

So trace the bad, their appointments and promotions,
and the trees of hires and promotions thereafter
and you shall find those to remove from power.
Break the links in government that make it run for the rich few
instead of running for We the people, and make all take an oath
to serve the people of the nation,
With one worker family supporting wages.

And tax the high end to move the funds to benefit
the low end with jobs in green energy areas.
with decent money the low end drives the economy best.
cause this is where the market multiplier has zest
and it's good for private industry as well
when regulations stop their cheap sucks
on federal and state money chunks

meant to serve:

We the People of the nation.

Summary of 9 JFK books JCD read and recommends

1. Best Evidence by David S. Lifton , 1980: Complete documentation of the change in body evidence of John F. Kennedy's corpse in the first 6-10 hours following the shooting of the president. I recommend getting the movie "Best Evidence" where David interviews key witnesses to the story to allow the viewers to come to their own conclusions. Very well done. It's shocking what the military and Secret Service did with the body of JFK that day. A must read.

2. Rush to Judgment by Mark Lane, 1966: Excellent review of the ineptness of the Warren Report. Lane interviews witnesses in the early years after Kennedy's death. He documents the Oswald negative result of the parafin test for the alleged murder weapon and shows that a lie was perpetuated in the media about it being positive. (*In other words, Oswald did not fire a rifle that day by the evidence)*. The test positive for a pistol (nitrates on both hands is inconclusive and likely the result of printers ink from his work) He documents the *false trail of finger print evidence* that the FBI fingerprint supervisor, with 32 years of experience, refuted when Lt Day of the Dallas Police shows up with a latent print 4 days later (when the expert saw none the day after the killing on the same weapon). He documents the test of the 3 master riflemen from the NRA who had the Mannlicher-Carcano, allegedly used by Oswald, first rebuilt so that it could be sited *as Oswald's rifle lacked one shim to align the sites*. Then with 6 shots a piece at *non moving targets none of the Masters* shots hit the neck or head on the target and only one master met the timing constraint. This was sponsored by the Warren Commission. All were given unlimited time for their first shot. The Warren Commission still affirmed that Oswald, who barely qualified with a rifle in the Marine Corp got 2 out of three shots to count with no alignment on his scope to correctly determine aim, and while the target was moving. That is preposterous! The Commission committed treason in the identification of Oswald as the shooter as he did not fire a rifle that day, the rifle (that showed up the next day as the murder weapon) was out of alignment with the scope, and the alleged shooter was a below average shot, while masters, the highest experts in the NRA, failed to prove feasibility with the same weapon (after alignment) on a fixed set of targets in 6 tries each (18shots). Mr. Lane also documented the false i.d. of a

German Mauser 7.65 on 22 Nov by three Dallas officers on the sixth floor, which became a Mannlicher-Carcano the next day. (*They flubbed the weapons plant*). He documented the need for *20 year old ammunition for the Carcano* as ammunition fabrication had ceased 20 years previous. Such ammunition would be unreliable. He documented the near blind fearful man, Mr. Brennan, as the key witness against Oswald for the Kennedy shooting who didn't identify Oswald at first and needed to be talked into it. And it goes on and on and on. The preponderance of witnesses thought the fatal shot came from the grassy knoll and that's where everybody ran after the shooting, including people in the book depository. He identifies these witnesses painstakingly. This book refutes the Warren Commission findings. *Excellent first read*

3. Plausible Denial by Mark Lane, 1991: Documents Counselor Lane's defense of a magazine sued for slander by E. Howard Hunt, an alleged CIA conspirator in the assassination of John F. Kennedy. Lane located an inside witness to a major part of the murder conspiracy, Marita Lorenz, a past girl friend of Fidel Castro who was lured into the CIA by Frank Sturgis in a plot to try to kill Castro. Because Sturgis was a mid level honcho for the recruitment of "Bay of Pigs" volunteers, and he and his men hated Kennedy and when given the order to assemble a caravan to head for Dallas, took Marita along with them. She testified by written deposition of her witnessing of E. Howard Hunt as a paymaster for the slaying of John F. Kennedy. Hunt was a superior to Sturgis in the hierarchy. Marita, Sturgis, and several Cuban counter revolutionaries traveled to Dallas with a separate car full of weapons and arrived on 21 November, 1963. They stayed at a Motel where Hunt was located and Marita witnessed him paying off Sturgis and Jack Ruby. Riders in the caravan included Gerry Patrick Hemming, the Novo brothers, and a pilot named Pedro Diaz Lanz (and possibly more that she didn't identify). The jury believed her testimony and found for the defendant. Past CIA Director Richard Helm is also identified as having initialed a memo identifying Hunt's presence in Dallas on 22 November, 1963. Marita did not take part and left town on a flight to New York on 21 November, 1963. She reported this to the FBI in New York the next day But the FBI was forced to get in line behind its Director on 22November, who disregarded every bit of truth. *John C. Dean believes Pedro Diaz Lanz looks like the umbrella man from photos of him on the curb after the shooting.* The FBI forced the Oswald conclusion, which everybody has trouble swallowing to this day.

4. The Great Zapruder Film Hoax by James Fetzer, et al, 2003. This is a book that scientifically details the corruption of visual evidence presented in the Zapruder film. It says that the film available today is a copy of the original with the deletion of frames, blurring of frames, use of traveling mattes to offset the foreground (limo party) from the background (with possible artistic overlays), and reconstitution through the use of an optical printer to provide a seamless copy with dubious content. A simple test to prove the use of an optical printer which requires Kodachrome film (rather than the daytime Kodacolor film) is to subject a small piece of the "Zapruder film" to a destructive chemical test to see what type of film it is: Kodacolor (daylight film) as in the original, or Kodachrome (night time and lab film under nonsunlight conditions) as in any edited seamless copies. *The House Committee on Assassinations refused to allow this test even though it could be done on the Zapruder family section of the film without affecting the historical Kennedy part. I call that an obstruction of justice in the investigation of a murder case of a US president and treasonous behavior*. The analysis includes a phony remake of Mary Moorman that shows her on the grass rather than the street (where she was) when the limo passed her by and the head shot occurred. Dr. John Costella, David Lifton, and numerous other major researchers joined forces for this project with Fetzer. *This book presents irrefutable evidence as to the alteration of the Zapruder film, handled by both the Secret Service and the CIA on the night of the assassination.*

5. Blood Money & Power by Barr McClellan, 2003: tells the experiences of one of Lyndon Johnson's attorneys over the 5 years he served as counsel to Johnson while employed by Ed Clark, Johnson's principal attorney and business partner during his career. Convincing hear say evidence is presented by Attorney McClellan who lost his license to practice as a result of his betrayal of confidential client information when he wrote this book. So here's a man, late in life, willing to give up his profession and face criticism (and possibly death) to set the record straight. This book covers the disappearance of 3 poll volunteers who witnessed a change in the books at one polling site that threw the election to Johnson in the '48 Democratic primary for the senate. He knew the attorney who cooked the books, and later when the heat was turned up the book was burnt and the poll workers were never found.

Barr also explains the money shuffle and business appointments made possible by having a seat in congress. Johnson appointed cronies or people he could leverage for later assistance and became very rich from kick-backs and laundering. Ed Clark got Mack Wallace off with probation for first degree murder because he controlled the judge. It is my contention that this money siphoning business has been taking place ever since and grown to include borrowing money against the US to steal for private use by the crooks who run the country. This crime would be of enormous proportions starting with the Reagan Administration (who tripled our debt over its first 200 yrs.). The crooks are not satisfied with skimming what the US buys for cash; they went into borrowing money (to up the cash available) and stealing that against the credit of the people of the United States. Barr accounts for the thinking of men in this generation in Texas, where murder is just another business tool, and probably still is. *Johnson* was an angry tough Texas politician who could also coo. *He'd do anything to get what he wanted, and he wanted the presidency.* This is an inside view of the real Lyndon Johnson and the scummy business he perpetrated. He was a mental and emotional wreck in his final years and it would be interesting to see his psychiatrist's notes. He had a grand jury indictment for murder, posthumously.

6. <u>JFK and the Unspeakable</u> James W. Douglass, 2008: This book details the Presidency of JFK in a way to help the reader understand why he wasn't liked within the government and exactly what happened to make it that way. He wasn't there to play a "give and take" game; he was there to do what he thought was right for the nation as a whole and the people who he represented, *only greedy angry minority elements in government and industry didn't agree with him, and so he became a doomed man.* Other witnesses are detailed beautifully to add to the proof of conspiracy. There's a soldier on leave (Gordon Arnold) who felt two shots whiz by his head on the knoll during the assassination, shot from behind the picket fence, who gave up his film and got out of town quickly out of fear. Movie interview avail. A deaf man witnessed two men behind the picket fence and a rifle torn down quickly after the shooting and stuffed into a railroad workers tool bag. Other assassination attempts prior to Dallas include Chicago September, '63: JFK cancels under advice. Florida, another try.....then Dallas. The book had a background spiritual tone (which I accepted as the leaning of the author), but was otherwise very informative and sensible.

7. Confessions of an Economic Hit Man by John Perkins, 2004: This book is a tell all on U.S. Foreign Policy (muscle around the world to control natural resources and markets and governments). The author confesses to have been a high level set up man for leveraged control of foreign nations. He explains the idea like this: *A high level study team arranges to meet with high level government officials from a foreign nation (that is of interest). They propose to study how a major infrastructure change to the less developed nation can lead to great progress and great profits for that nation. Their study is abnormally optimistic leading the host nation to bite on proposals to do the work. It is always over the head of the nation a bit so that they need to borrow money to get the work done. Arrangements are made with the World Bank to provide the funds. The development runs into typical engineering changes and cost increases and delays and when it is complete the nation is way over its head in debt, and performance is not as good as they expected. So the U.S. Company offers to help pay the debt for concessions on their resources. That's how we interact with third world countries.* They also offer huge money up front to the leaders to become business partners or to just outright use their resources or get concessions to drill. And sometimes *they offer huge money or death right up front*. Be with us and get rich, or we'll kill you. If business arrangements cannot be made they call in the "jackals" to kill the obstructing leader. These are CIA hit men or their contractors. If, as in the case of Saddam Hussein, neither of the first two options work, we send in the armed forces of the U.S. for some B.S. reason, like we fear their use of weapons of mass destruction against us; they have them and we don't trust them. Or, it doesn't matter; it was right to attack an evil dictator and liberate the people (set-up a phony democracy that we run remotely). This is what we did. We did it to establish an oil pipeline to the gulf to permit international shipping of Iraqi oil (that Saddam would not allow). *And my opinion is that the Bushes are founding fathers of this treacherous plutocracy which started before Kennedy became president and kills America's children in their wars.* The author also documents the bad effect on the economy of the populations so subjugated.

8. Crossfire by Jim Marrs 1989: This book documents it all. It shows a detailed, multiple witness supported conspiracy to kill John Kennedy. Excellent reference.

9. Treachery In Dallas by Walt Brown 1995: documents the lack of law enforcement in the JFK murder case in Dallas and the complicity of the Dallas Police, who knew Jack Ruby real well. There was no sealing of the area after the crime with retention of possible witnesses/conspirators. Normal street traffic was resumed in 5 minutes. Nobody knows how many souvenirs were taken. Pieces of the president's skull and flesh stuck to tires that cruised by within minutes after his execution. People came and left freely. Oswald took his time leaving (about 5 minutes) and took a bus. Evidence disappeared and was created (bullets gone and Oswald fingerprints created by a bad cop, Lt Day). Nobody carefully swept the 6th floor nest for 45 minutes. But enough eyes were watching to swoop down and pick up people's film. By evening all exhibits were being sent to Washington where Johnson ordered FBI sovereignty in the case and called the Dallas police to have them turn over all evidence. Brown noted that in the time (1963) a prerequisite to becoming a Dallas police officer was to have membership in either the KKK or the John Birch Society. A few of them were worse. The first witness up the knoll was Beverly Oliver and she saw only cops and train worker(s), and thought they had it under control (not thinking until later that one or more of them might be assassins). It was Sgt Patrick Dean and Officer Roscoe White. Roscoe White is suspected as the cop shooter on the knoll (that shows up in Mary Moorman's photo, under special analysis) and being the killer of officer Tippit. And evidence suggests there were 2 shooters behind the picket fence. He shows Oswald's involvement with the CIA and FBI which both services deny. Johnson and Hoover were under the control of big oil.

Biggest Issue of Takeover

The biggest issue in the US takeover is the huge transfer of money that started with the accrual of national debt in 1980 by Ronald Reagan. *He tripled the combined debt of the previous 39 presidents over the first 200 years of US history* in his 8 year term. The sum debt at that time was $880 billion dollars for the first 200 years of operation of the United States of America. What Reagan's extra debt achieved was a transfer of $1,600,000,000,000. (1.6 trillion dollars) extra cash to private industries, private individuals, of the full amount of his 8 year term as president plus the sum of all taxes collected from the people of the US during that same interval of time, typically used to pay for these "goods and services" provided to the government.

He spent all of the tax money collected plus 1.6 trillion dollars of borrowed moneys on behalf of the US during his 8 year term, tripling our outstanding debt of the first 208 years to 2.4 trillion, during his term as president *That is outrageous!! That is unprecedented!*

And

GHW Bush redoubled the debt to 4.8Trillion in half the time (4years more). So US debt rose by a factor of 6 over the first 200 years during the 12 years of Reagan and Bush1, an odious act.

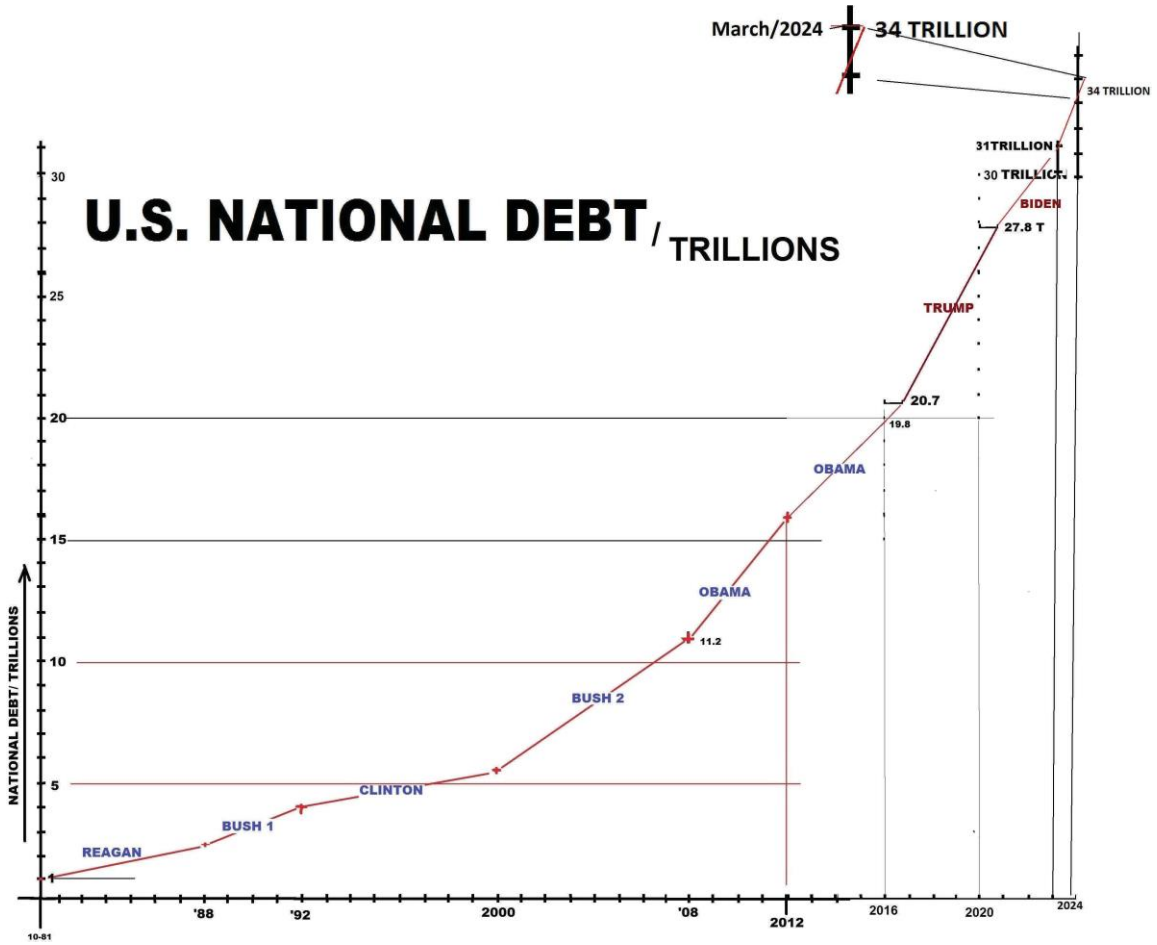
Now Clinton cooled things down, accruing another ~1.5T in 8 years. That was the last "cool down".

This whole thing is radically contrived and is stealing from the good credit of the people of the United States of America

since nobody in government has reduced the debt at all.

G.W. Bush added 6T in 8years twice his father's rate. Plus he demolished the twin towers (see page 78) and blamed Muslim countries.

He and his dad got us into Iraq1, Iraq 2, and Afghanistan to chase Osama Bin Laden but let him slip into Pakistan, and **killed 1 million Iraqi civilians**, while installing a puppet government in Iraq, buying them, and connecting their oil to the gulf for international shipment that is controlled by the West. See the accumulated national debt from Reagan to Biden on the next page. Obama had to continue the debt increase by an extra 30% over Bush2, and for that he wasn't killed and his "book deals" made him go from $1 M to $15M, a good servant of the covert conspiracy running the world. He accrued $9,500,000,000,000. ($9.5T) in debt in 8 years, $1.1T/year and is currently worth an estimated $50Million dollars at the start of 2023.



<u>What a bad deal for We the People!</u>

Trump accrued $7.1 T or on the order of 2T/yr and Biden is on a slightly lower rate than Trump. We're at $31T at the start of 2023, and Trump and Biden contributed a full third of the pile shown on page 79.

<u>We must have a Balanced budget amendment to the constitution immediately</u>

Debt is $34Trillion at start of 2024

with a 500 Billion pay back/yr on debt.

Argument Against Airplane Collision Cause of 911 Tower Collapses

by John C. Dean 2-27-22

The towers fell in 10 seconds each. This can only be done in a controlled demolition. The 10 second time is very close to the 9.2 seconds time of a rock dropped from the top of the tower that hits the ground UN-IMPEDED in 9.2 seconds for a tower height of 1362 ft as is the South Tower.

$h = 1/2\ g\ t^2$ is the controlling equation showing the relationship between height of the drop, h, (1362 ft for the South tower) , g = gravitational constant, 32.2 ft/sec^2 ; and t is the time in seconds for the rock to hit the ground after being dropped at 0 velocity from the height h, in feet. The tower cannot hit the ground any faster unless it is pushed by a force that augments gravity, but no such force was seen.

Solving the equation for t we get

$t = (2h/g)^{1/2}$ or $t = (2724/32.2)^{1/2} = 9.198$ sec ~ **9.2 seconds**

To achieve the free fall time any debris at the top has to be un-impeded by building debris below it on the way down. This allows the top debris to reach the ground in 9.2 seconds.

The top debris un-impeded means that it accelerates at the rate of the gravitational constant, 32.2 ft/sec every second of the fall without bumping into debris below it, as if it were a rock. This top debris would be traveling at 32.2 X 9+ sec $\geqq$ 289.8 feet/sec at the start of the 10th second just before it hit the ground. To keep the lower debris out of the way of debris above, the lower floors should be accelerating at close to the same rate as the top debris within a split second. I'm guessing that the .8 sec overage to hit the ground for the top is split uniformally between the 109 floors below the top so that the next floor is blown .8/109 = 7.3msec after the previous floor. This would then yield the ~10 seconds fall time for the whole building (each). All floors would start to crumble within .8 sec of the first detonation. The top floor would fall to the height of the next floor down in .9 sec, but in that time all floors have begun to crumble, and the 2nd floor from the top started to fall 7.3 msec after the first one was ignited. The first floor is ahead in the acceleration cycle and gains speed quicker, but it will never catch the next floor down because the next floor is 13 feet down and it's only 7.3 msec behind the first floor in its acceleration cycle. At its highest speed, ~290 feet/sec the top floor only travels 290 X .0073sec = 2.1 feet more than the next floor down, not enough to make up the 13 ft distance between them at the start. The floor below has done the same distance as the one above minus this one increment at the highest velocity.

The same is true for any two adjacent floors on down the line. So in this explosion sequence, one floor more every 7.3msec explodes, but no floor collides with one below so the 10 second time for all to hit ground is expected.

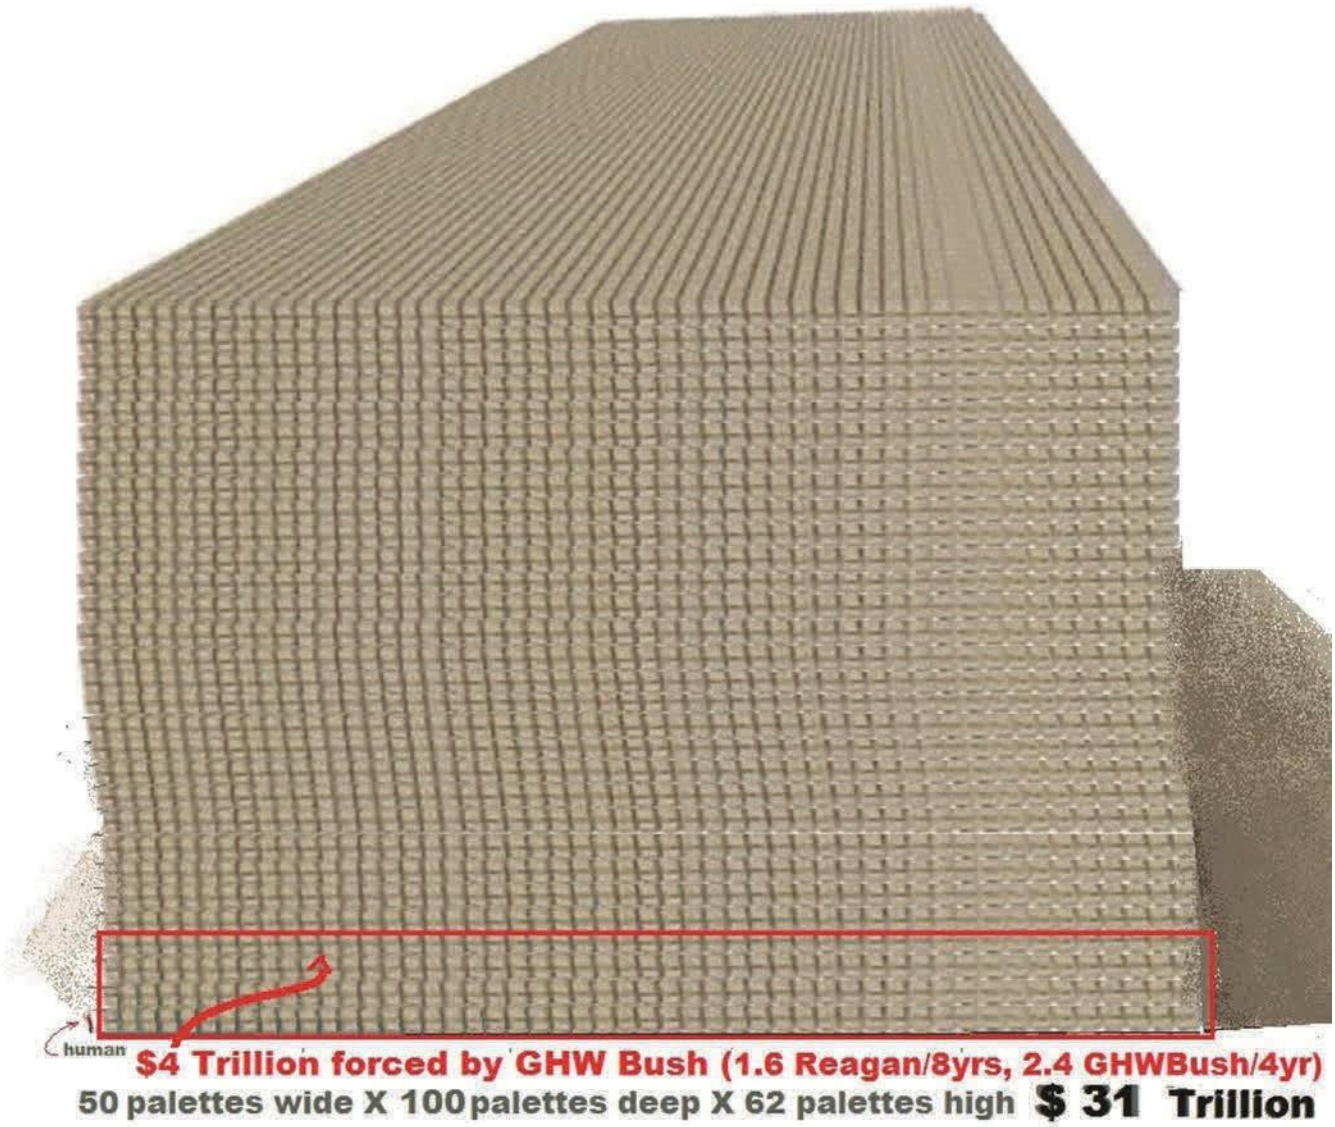
Bingo! The detonation cycle of floors could have been 7.3 msec apart with 9.2 sec (rock fall time) plus the spread in ignition times to cover all other floors .8sec = 10.0 sec, exactly what was measured and expected by my argument. It was a demolition as I describe above. Any heating of the metal structure caused by the aircraft collision fire will affect the upper floors above the hit point more than the lower floors, as heat rises. There is no way that the fire melted the lower support structure in the exact sequence of the controlled demolition that took down the buildings. The melting point of the steel supports was near 3000°F. Any humans in the towers would have been evaporated by this heat during the fall of the towers. The airplanes hits had no symmetry with respect to the crossection of its hit on the building, so the buildings should have, at most, buckled at the hit points with a partial collapse by the floors above but with no collapse below the hit point, and nothing like the complete collapse that took place for each building. Building #7 had no collision to start its collapse and did not spontaneously fall for no reason. **All buildings were demolished by G.W. Bush plan/approval/execution. He is the responsible agent. A missile hit the Pentagon** in coordination with an airplane flyover on a different course. Its fire ball was 1/20th the volume of the tower fireball hits by airplanes; it only burnt a 65 ft section of the pentagon ,which wall fell over on the next morning exposing unburnt combustibles in adjoining sections (which would have been in the range of the wingspan of a plane, with gas inside the wings) but because it was a missile these combustibles remained un-ignited.

The missile head penetrated 6-7 1.5' steel reinforced concrete walls deep into the pentagon with a smaller crossection than an airplane, something a thin walled aluminum flying gas tank (an airliner) could not do. And, while missile parts appeared in the wreckage in front, no giant tail or wings or engines of any airplane were sheared off by the pentagon and left as debris. Also smudge pots were out front to block the view of bystanders. The whole 911 attack was an intelligence operation by US officials to provide GW an excuse for war. (The concept for such a scheme was introduced by Gen. Lyman Lemnitzer, but not used by his boss, JFK, as a spoof to create war against any adversary we want to fight). Bush used it for 911, then he started the middle east wars that just ended with Biden, 20 years later.

GHW Bush owned Reagan for his near death hit by Hinkley.

I bet he forced debt demise kickoff in 1980.

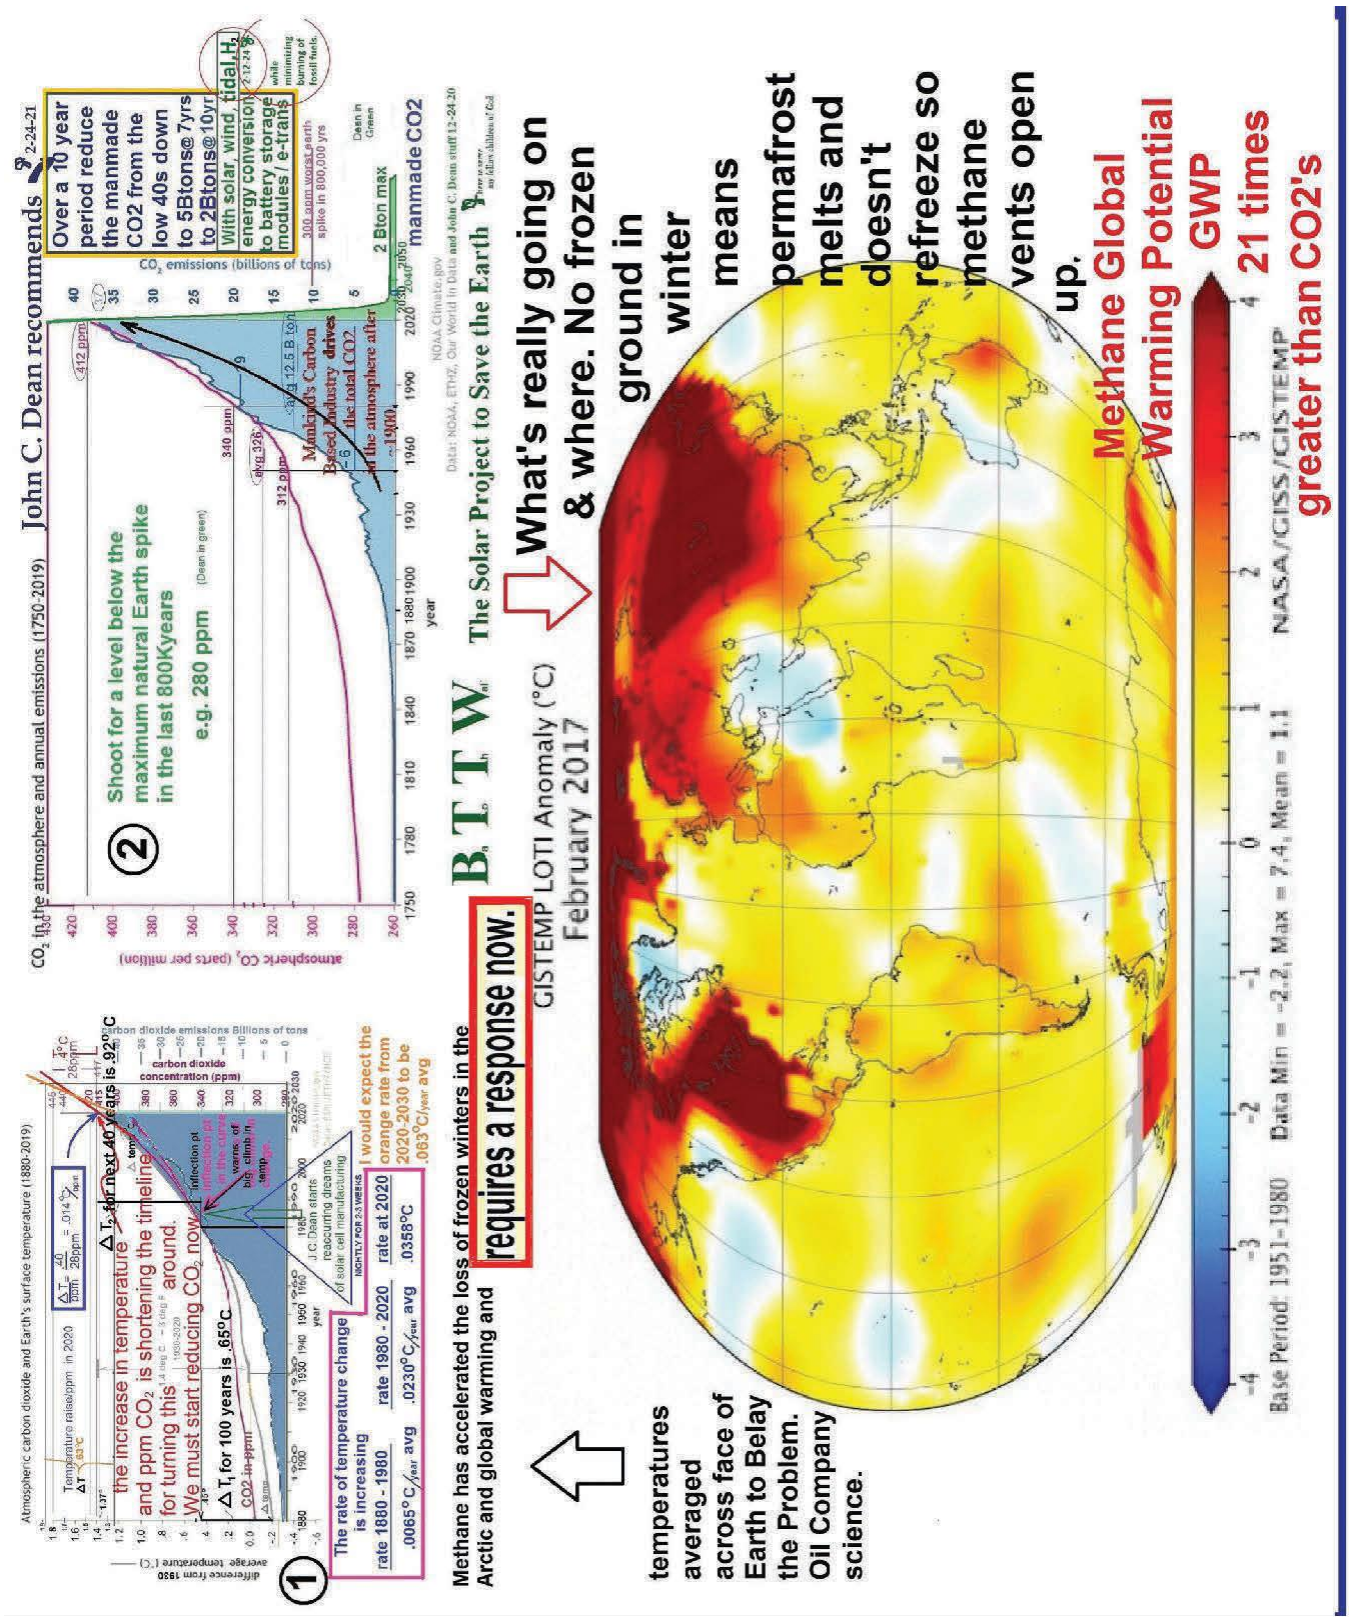
Skull and Bones needs to be dust, with a law to forbid any other such club.



in $100. bills only. Solid mass $31Trillion worth of $100 bills above. See human, ~1/16 inch high, lower left of humongous pile (with blue pants and a red shirt.)

<u>Compared to all preceding presidents combined, those from 1980 to 1992, accrued 6 times the debt in 1/17th of the time for 100 times higher debt accrual rate</u>

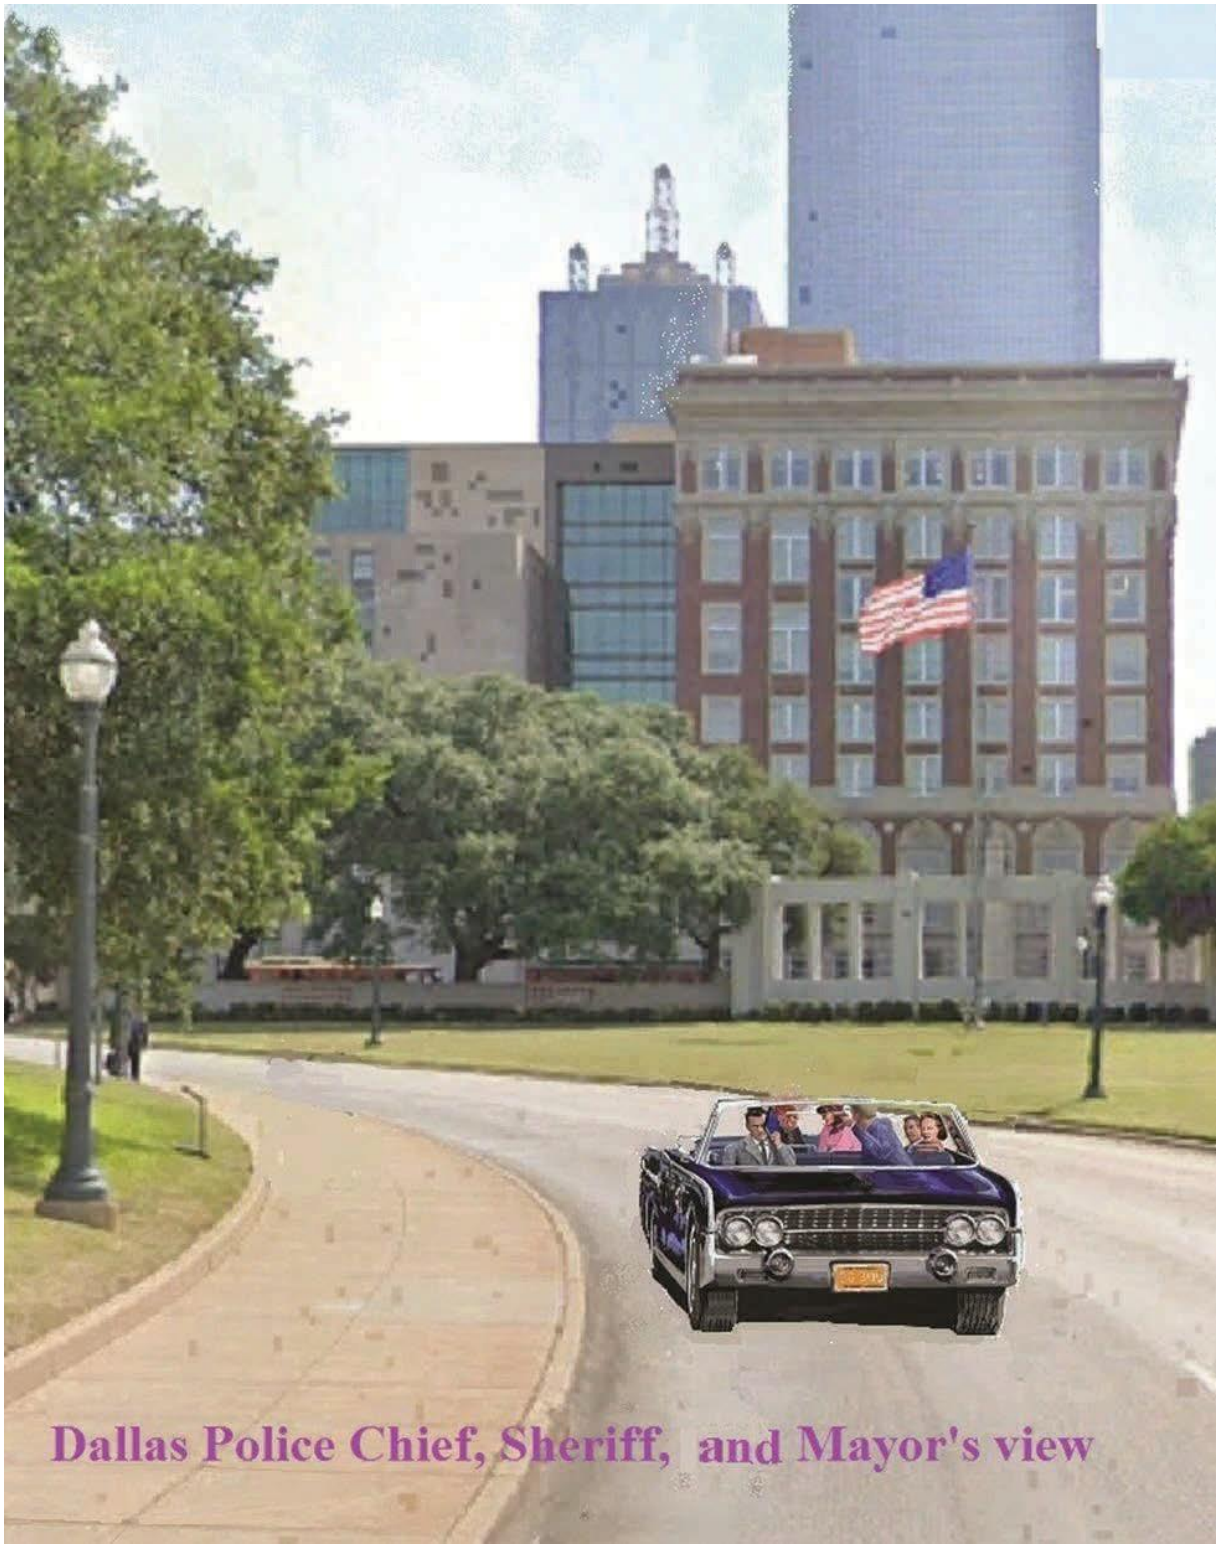
<u>Real BAD GUYS:</u> ***<u>REAGAN</u>*** ***<u>GHW BUSH</u>***



GLOBAL WARMING WARNING

Secret Service Car View of JFK Assassination

City Authorities V*iew of JFK Assassination*



Born in Montebello, CA, John grew up with interests in art, music and science. In 8th grade he received all of the academic awards for his graduating class. In high school he took accelerated classes in English and Math, played football and ran track every year. He learned Spanish and went to Mexico City on a student exchange. He studied engineering in college at UCSB and got his BSEE with high honors in '67 and an MSEE at Cal Tech in '68. Then he joined the service as an officer and became a founding member and Chief of Operations of the first joint Tactical SATCOM System Control site. He made Captain and left the service to continue in military SATCOM with the Navy where he did system design and testing at an EFH SATCOM terminal for submarines. He went to sea on the USS Finback and proved feasablility. Then John managed the first study of satellite laser to submerged subs for Commnand/Control. With support of the Optical Division, 3 months and $50K, they completed the study! Being short he outlined the final report in handouts and they met 1 time. He presented the concept, they split up the chapters and he gave them the deadline for their inputs to him. He then took it all in, wrote conclusions, integrated the chapters and had illustrations and quality reproduction of the results to a national audience of about 400. A $1,000,000 contract to redo "The Dean Report" and $10,000,000 of 6.1 money into the budget to push the technology along was the result. John returned to the ADM cycle for the EHF SATCOM, but trained himself for less stressful work and tighter budgeting in the Arts and succeeded. (1980 to present). free-ebooks.net, author search John C. Dean for more.

This book: **US Truths and Remedies,** non-fiction, will startle the world to see the truth on numerous events in our history. For the JFK assassination I have convincing photographic proof that his driver, Bill Greer, stopped the limo cold, turned around to his right, popped up, and fired over JFK's fist for the fatal head shot with a special bullet made by the CIA. Alternately, I researched the missed shots (16-20) and conducted a rigorous forensic ballistic analysis of all shots to show the sequence and limo position for every shot. It required numerous measurements and calculations for each shot to complete the scenario. There could have been more shots, but not any less. I've rechecked my calculations many times. My 4 shot combo maps document all of the shots perfectly with the evidence for how the president was killed. Photographic evidence included is enough to prove a major conspiracy killed him. RFK, 911, & national debt/economy plus changes needed in government are also identified. A People's rep is added with 20% vote in Congress to bolster the poor end of the economy.
